## Cooperation with local companies/governments

- Local partners:  
JC Agricultural Cooperatives Co., Ltd  
(Sales of agricultural machinery materials in Cambodia, provider of smart agri-services)

Leaf color analysis

Weed analysis

## Targeted economic/social issues and solutions

- The Government of Cambodia is making nation-wide efforts to expand agricultural exports. The promotion of paddy rice farming is the cornerstone of agricultural growth and the primary agenda for Cambodia.
- Introducing a leaf color analysis service (Iroha) for rice crop farming, the main crop in Cambodia, to automatically take images of farmlands by drones and upload them onto the cloud network for analysis.
