

ACSL Ltd.

<https://www.acsl.co.jp/>

- ❑ Address: Edogawa-ku, Tokyo
- ❑ Employees: 65
- ❑ Established in 2013
- ❑ Business: Manufacture and sale of industrial drones

Project name

- Demonstration project related to the technical support for industrial drones in India

Cooperation with local companies/governments

- Local partner: Aerodyne India
- Details of cooperation and collaboration: Transfer of drone technology to the partner above to develop business in India.

Local economic/social issues

- So far, 65% of the drones in the market has been imported from overseas, but it has changed to the in-house production policy since October 2020.
- On the other hand, although the country will be the world's third largest drone market in the future with its growing population, there is a shortage of leaders in the field.

Details of demonstration

- Verification is made on the business development through the transfer of technology/know-how of drones to the partner and the use of the Indian government's digital platform.

Expected outcome

- Contribution to the improvement of productivity and labor-saving in dangerous work by providing drone technology for industrial use.
- Contribution to the overseas expansion of Japanese models.
