

T-ICU Co., Ltd

<https://www.t-icu.co.jp/en/>

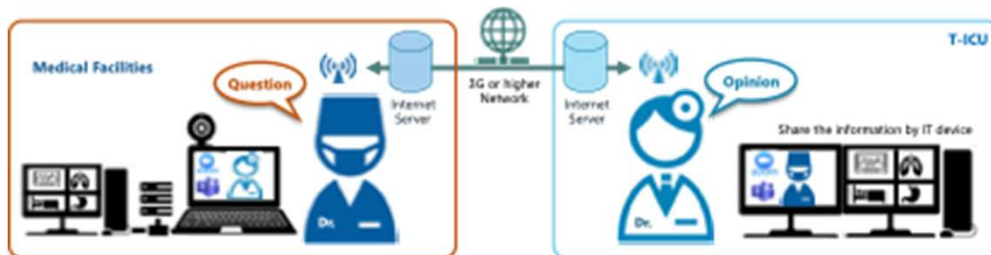

- Address : 3-2-5 Hachiman-dori, Chuo-ku, Kobe, Hyogo 651-0085, Japan
- Employees : 42
- Established in : October 2016
- Business : Tele-ICU services

Project Name

Demonstration of Tele-ICU in the field of healthcare and COVID-19 infection control (Bangladesh)

Cooperation with Local Companies

- Local Partners: Marine City Medical College Hospital and Medical Centre Hospital
- Details of Cooperation: System implementation and field demonstration

Local Economic / Social Issues

- Bangladesh is struggling to control NCDs in addition to infectious diseases.
- The number as well as knowledge of medical specialists and ICU specialists are insufficient to promote e-health in Bangladesh.

Details of Demonstration

- We are the only company in Japan that provides remote critical care management support services by specialist physicians. We demonstrate the feasibility of implementing a telemedicine system in the field, focusing on tele-intensive care and emergency medicine, using advanced information and communication technology (ICT).

Expected Outcome in the Future

- Provide opportunities for local physicians to receive specialized instruction and eliminate the shortage of specialist physicians.
- Provide high quality medical care and shorten the duration of patient care.
- Decrease hospital costs.
