			22	SilverConnect Pte Ltd	Singapore

\* Participate remotely

# Finalist Startups

Challenge Owner	ID	Startup Name	Country	Service - Product
Itochu Corporation	1	Smartfuture Pte Ltd	Singapore	A proprietary, E2E, white-label, customizable Remote Patient Monitoring Platform
	2	Fast8	Indonesia	Offering includes an HRIS platform, a CRM platform, and financial services (employee loan, insurance, etc)
	3	AEVICE Health	Singapore	Non-invasive wearable devices enable the early detection of cardiopulmonary abnormalities remotely and in real-time, so that patients can receive fast and targeted care from the ease of their homes
Pfizer	4	Hidoc Pte Ltd	Singapore	A digital health app is a comprehensive care platform providing both online and in-clinic consultations across 25+ medical & ancillary specialties
	5	5 Health (Bot MD)	Singapore	An A.I. Clinical Chat Assistant. The A.I. integrates with hospital information systems and power chat platforms like LINE and WhatsApp to help doctors automate patient engagement, education and remote monitoring
	6	Stethy	Australia	Industry grade AI and automation tools that automate mission critical data workflows to drive operational efficiency and accelerate time to market to get patients the products they need, fast
Buhler	7	IntegriCulture Inc.	Japan	A cellular agriculture enabler company, equips the client with a sustainable and future-ready capability of producing animal-based products such as meat.
	8	Protenga Pte Ltd	Singapore	Develop data-driven Insect Technology that enables a circular, regenerative, economy all along the food supply chain and produces best-in-class, sustainable Insect Products for pet food, animal feed and plants
	9	NUProtein Co., Ltd	Japan	Succeeded in manufacturing growth factors from edible wheat germ, and reducing the cost of growth factors to 1/3000 compared to ones from mammalian cells
Roquette	10	Algrow Biosciences	Singapore	Create sustainable nutrition at scale, with upcycled microalgae. We target up to 85% cost reduction vs algae incumbents with our proprietary biorefinery approach.
	11	Alchemy Foodtech	Singapore	A deep tech company with a mission to "Make Carbs Good" by reducing sugar, reducing carbohydrate, and reducing Glycemic Index (GI) of foods, while maintaining great taste and texture
	12	Mycosortia Pte Ltd	Singapore	Transform fiber- and protein-rich food side streams such as okara to protein-rich food ingredients, FibProtTM.

# Finalist Startups

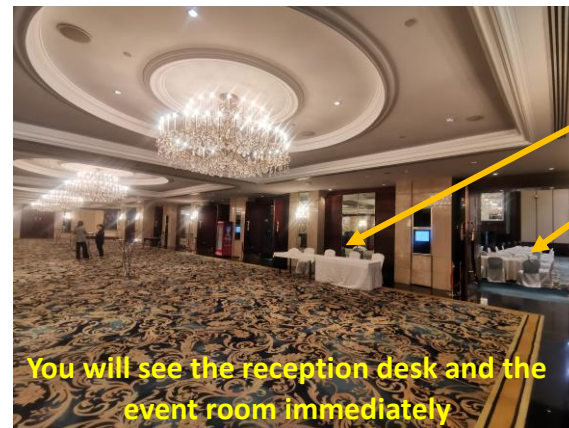

Challenge Owner	ID	Startup Name	Country	Service - Product
Takenaka Corporation	13	Opsis Emotion AI	Singapore	Specialise in scientific emotion detection on Facial, Voice Tone and Body Language of people to reveal their emotional state
	14	Optimays Inc.	Japan	Specializing in cutting-edge computer vision and voice analysis technology to detect and analyze the number of people, movement directions, age, gender, clothing patterns, and ethnicity using AI-driven camera systems.
	15	Aimesoft JSC	Vietnam	Virtual Human software packages, including AimeReception - virtual receptionist, AimeTalk - virtual slide presenter, AimeHotel - virtual hotel clerk
Johnson & Johnson	16	NDR Medical Technology	Singapore	Automated Needle Targeting system (ANT) that can facilitate safe and accurate needle punctures to organs such as the lungs, kidney, pancreas, and spine
	17	OUI Inc.	Japan	A Japanese medical startup founded by ophthalmologists from Keio University School of Medicine. We team up with professionals in the fields of Medicine, Engineering and Business. Our vision is to protect health of patients all over the world through our technologies and solutions focused on ophthalmology.
DeNA - Allm	18	CRIAM Knowledge	Portugal	Portable blood testing device for fast and reliable on-the-spot diagnostics. Several tests performed on same device. No sample preparation required. High accuracy. Fast turnaround (<3 mins). User-friendly. Wifi/5G connectivity
	19	Thrixen	Singapore	A multiplex point of care diagnostics platform that is making robust and clinically relevant diagnostic tools that are easily scalable and affordable to large patient populations and varied healthcare settings.
DeNA - Allm/ Panasonic	20	GaitMetrics Pte Ltd	Singapore	An AI-powered and non-intrusive human monitoring system developed based on human gait biometrics extracted from such radio frequency signals
Panasonic	21	Rehab Happy walk under IQ med	Thailand	The toolkit for reducing freezing gait in Parkinson's disease people
	22	SilverConnect Pte Ltd	Singapore	Ready solutions for foods and drinks (not liquid diets) for existing Singapore nursing homes, hospitals and patients.
