## Message from Chairman and CEO of JETRO

The Japan External Trade Organization (JETRO) has a global network spanning over 70 regional offices abroad and over 40 offices within Japan. Using this network, JETRO contributes to two-way expansion of trade and investment between Japan and the rest of the world with our ability to connect between business and government, business and business and people and people.

One important mission of our organization is to help Japanese companies expand business overseas. Japan, a super-aged society in which one out of every four people is over 65, has abundant experience and knowhow in the nursing-care field. In this context, Japanese products and services will be of much help particularly in the countries of Asia, which are facing rapid aging in their own societies.

JETRO was designated as a core organization tasked with facilitating overseas business expansion by Japanese companies active in the nursing-care industry in the “Growth Strategy 2017” and “Asia Health and Human Well-Being Initiative” set forth by the Japanese government. From even before then, we have been introducing Japanese products and services related to nursing care to the rest of the world through numerous business matching events both overseas and within Japan.

Under the auspices of the Japanese government and relevant industrial groups, we have created this directory of manufacturers and service providers which aspire to contribute to medical communities abroad, with the goal of introducing high-quality Japanese products to an even broader range of people around the world.

We heartily recommend you to contact any of the companies listed in this directory if you are interested in their business or products. You are certain to encounter first-rate products and services for elderly care related to effective prevention, rehabilitation and self-reliance support, all areas where Japan excels. Please do not hesitate to contact us at JETRO if you have any questions.

It is our hope that this directory will help play a role in the future success of your business.

**Hiroyuki Ishige**  
Chairman and CEO  
Japan External Trade Organization (JETRO)

## What is JETRO?

JETRO, or the Japan External Trade Organization, is a government-related organization that works to promote mutual trade and investment between Japan and the rest of the world. Originally established in 1958 to promote Japanese exports abroad, JETRO’s core focus in the 21st century has shifted toward promoting foreign direct investment into Japan and helping small to medium-sized Japanese firms maximize their global business potential.

## About the company and products

Care Service offers comprehensive services from elderly care to Angel Care (Post-mortem treatment). Elderly care such as day services and visiting bathing services are well known. However, Angel Care might be a new service concept for some. So what is Angel Care? In Japan there is a traditional ritual called 'yukan' in which the family gather and wash and cleanse the body of the deceased. At Care Service, we offer Angel Care in that we combine the 'yukan' ritual and our unique service for the family to have the last and memorable farewell. We sincerely believe that providing Angel Care is our mission and commitment, positioning it as the 'terminus ad quem' of the elderly care. Our elderly care services cover mainly the 23 wards of Tokyo, while Angel Care is expanded covering a large areas in collaboration with local funeral directors and mutual associations. Currently, there are more than 100 offices at Care Service including all the services.

Visiting Bath Service

## About the company and products

Our day services, called "Posi-Age (Positive Aging)" provide half-day exercise programs for older people. The programs use specific training machines and individualized exercises in order to improve their body functions and to maximize their independence. The programs aim to maintain and improve their activities of daily living (ADL) and quality of life (QOL).

We currently run 6 facilities and provide our services to about 1,000 elderly people in total.

## Global activities

[Past and current international projects]: We launch day service for elderly in Tianjin, China in 2017.

[Countries and regions of interest]: China; Vietnam; Taiwan; and other Asian countries

Training program with specific training machines

## About the company and products

In-home nursing care business in general, operation in a movement nursing home, nurture business, educational related business and healthy meal offer service to senior citizens and children are being performed. Especially, our operation fusing care facilities with nursing school is the biggest scale in this segment in Japan. Through this operation, the senior citizens perform various activities for children, which naturally lead to their rehabilitation. Meanwhile, children can feed gentle mind to care for the aged by contacting and acting for senior citizens, also can improve their EQ. Educational Related Business gives learning support to school children and the graduates from a nursery school. Children take part in extracurricular activities under abundantly natural environment.

## Global activities

We are interested in consultation business of the area in China and Taiwan.

The state of the exchange with a preschooler and a senior citizen in a nursing home. You're living because mutual is reciprocal like every day.

A senior citizen will get in touch to natural rehabilitation by carrying on various activity with a kindergarten child. A picture is the state making a dish together.

## About the company and products

The Fukubo Nursing Care Group has engaged in nursing care business as a management philosophy "24 hours a day, 365 days, for everyone as users". We would like to provide support for the lives that all users can satisfy based on the four nursing care policies valuing "individual care", "dementia care", "care for the sick", "community care". We have offered care to over 25,000 customers. Our spirit provides one-stop care services to enhance the quality of life for all elderly people. We always act with gratitude and smile from the bottom of our heart.

## Global activities

We have established nursing care facilities in China and subsidiaries in Taiwan. In Vietnam, we have been preparing for nursing human resources development in cooperation with dispatching institutions, universities and supervision organizations to utilize the technical internship program for two years. Therefore, we are very interested in the elderly business in Vietnam.

Medium-sized paid nursing home that our company boasts.

We are engaged in welfare equipment business, nursing care facility management business, human resource education business.

## About the company and products

"Outline of Health Law"  
 • "Feel gymnastics" is based on Zen's respiratory method (breathing method) which passed on the "Yoga Law" which boasts a history of 5000 years of indication in India and the "guidance method" which is the wisdom of China for 4000 years. In 1919, Doctor Watanabe Kohki invented modern gymnastics and named it the "Space Road Body Stiffness Act" and started it.  
 • Dr. Watanabe discovers the internal organs movement of the mind and body (matching the mind and body) based on his own experiences and expresses his or her own feeling by having all the organs of the body mobilize by mobilizing each organ of the body. He noticed that the inner side was made use of and changed to a more flexible body. Fujiki Health Dojo practices this gymnastics in the morning and evening, is released from the stress of contemporary society, and is engaged in enlightenment·dissemination activities in hopes that both mind and body will be healed.

## Global activities

I have worked as an engineer 40 years ago in New York for 3 years. There is nothing about spreading healthy gymnastics until now. Since I understand English a little, I hope that I can communicate in English in Asia if possible.

## About the company and products

Fuji Oil Group are engaged in business in the three main fields of oils & fats, confectionery & bakery ingredients, and soy protein. By applying original technology to process plant materials such as palm, cacao, and soybeans, we create ingredients and products. To contribute to health and assist the solution of social issues in the sphere of food, we intend to continue supplying new value that anticipates the times through integrated operations in development, production, and sales. Right from our founding, we have been committed to efforts for innovation through constant challenge. We are determined to continue with these efforts so that we can get closer to customers, respond to the diversifying needs of consumers even better than we have so far, and pursue the possibilities of food ingredients for positive contribution to the joys of food and health.

## Global activities

Fuji Oil Group is conducting business in 14 countries, in Japan, China and other Asian countries, the United States, Europe and Africa. Each group company is developing, producing and selling food products locally in response to regional needs and demands. We will further expand our global business networks and strengthen our business structure to meet the demands of customers around the world.

Our soybean-based soft products are served to people receiving nursing-care to provide nutritious support to them using easy-to-swallow ingredients.

Textured soy protein provides a mouthfeel that is very close to that of meat, such as beef, pork and chicken.

## About the company and products

PALRO is a humanoid communication robot with an advanced artificial intelligence designed to mainly support preventive care activities. PALRO is used in nursing facilities in all parts of Japan.

By encouraging facility users to sing, dance, and exercise, PALRO helps improve locomotor functions while also stimulating brain functions by playing games and quizzes. PALRO can recognize the faces of more than a hundred people and can call out their names to initiate conversations around topics they have expressed an interest in previously.

The above interactions enable PALRO to bring a bit of joy and excitement to the daily lives of users.

## About the company and products

Fuyo kaihatsu Co., Ltd. is a member of Fuyo group consists of a hospital, a care facility for the elderly people, R&D section of ICT/IoT and construction section, it is responsible for headquarters functions and R&D functions. Our main product is "Anshin-net".

"Anshin-net" is a healthcare remote monitoring system for patients and especially elderly people. In ordinary, elderly people have tendency to become weak in their vital reaction, and sometimes do not have any symptoms of their chronic disease.

"Anshin-net" allows the user to manage the health condition easily without complicated operations by measuring and storing the daily health condition with a vital sensor.

Additionally, "Anshin-net" provides early symptom detection from small change of their vital signs such as body temperature, blood pressure, blood glucose, pulse and SpO2.

When "Anshin-net" detects a symptom of danger, it prompts care staffs to pay attention to the patient. Further more, patients and elderly people are able to receive an appropriate diagnosis service from a remote medical institution.

As mentioning above we have healthcare and care fields, so that we will be able to improve and enhance our system continuously.

## About the company and products

Since founding in 1896, we have been advancing together with medical and nursing care sites in Japan. We have sold hygiene materials for more than 120 years, this is possible because the customers trust us very much.

[Commitment of Salva: our incontinence care brand.] Ingenuity that can be worn quickly and easily, and a material that prevents irritation. Salva is full of ideas that we think out about caregivers and those who are cared for.

[Using the same weak acidic material as skin, Salva is gentle to the skin.]

One of the causes of irritation is that the inside of the diaper is made alkaline. Salva keeps the same weak acidity as the bare skin by controlling the pH value in the diaper.

[Salva provides a feeling of secure that it will prevent to leak.] Because it is very rare to generate a gap that will cause leakage, you can live feeling secure. Since Salva is a pioneer for adult diapers in Japan, it has quality that can be offered.

Salva Jiritsushien Pad. Easy open with one hand, same shape before and behind, so you can quickly use it.

## Global activities

In Tianjin City, China, we established joint venture company "Tianjin Kyorin Hakujuji Medical Sanitation Materials Co.,Ltd." in 1994, and started manufacture and sale in China. In the future, we'll strengthen our business in other Asian countries as well.

Salva Yawa Raku Pants (Yawa Raku means soft and comfortable) adopt front/back and up/down asymmetric design along elderly body.

## About the company and products

For more than half a century, Hakuzo Medical has been providing safe and reliable products to the medical and nursing care fields.

Our sales, R&D, and production department work together closely, listening to the medical and nursing care staffs' "how I wish I have this" voices. We have built a system which allows us to do continuous improvements, and we strongly believe that this is the reason why the medical and nursing care staffs keep believing in us and keep supporting our products.

We are a company that produces according to users' needs. Just like our trademark elephant, we listen to the medical and nursing care staffs' voices with our "big ears".

From now on, medical and nursing care provision system is expected to change drastically, and we want to be a close partner to all medical and nursing care staffs.

Mouth Clean A is widely used for bedridden patients. It provides oral freshness and frozen swab can be used for oral massage.

## Global activities

Hakuzo Medical started the overseas business expansion with the support from some public institutions (JETRO, MEJ, etc.) by placing globalization as part of the company's strategic policy. In 2015, the company set up the Singapore Representative Office. After gathering information locally and providing good local customer support, and we plan to build factories in one of the ASEAN countries in the future which will be used to supply the local markets.

Comes in 2 sizes, this product is thin, light weight, easy to carry. It is also great in ventilation and helps to disperse the body weight.

## About the company and products

As Japan's top manufacturer of industrial spray nozzles, IKEUCHI has supplied innovative, high-precision products to the world of over 60 years.

The fog produced by our spray nozzles is widely used in many industries for a broad range of manufacturing process.

One thing that we have learned from operating in the vast amount of industries that we have been privileged to support, is that "bringing new things and new services into the world is a true contribution to society". As a company, we have recognized and incorporated this as we grew.

We are grateful for this opportunity, and as the "Fog Engineers", our company will continue with product development that only our company can accomplish and a complete dedication to fog and contribute to supporting a vibrant society.

**COOLJetter® ULM**

Powerful, energy-saving humidification system. Automatic control of optimal humidity

## Global activities

To meet our contribution to society by means of fog, we have advanced and specialized our fog engineering in response to current issues and requests from partnering industries. Today the field of fog utilization is not limited to Japan, but is spreading across borders into other countries and markets.

In order to effectively respond to global needs we are establishing subsidiary offices and accelerating the movement towards our own global network. Until now, we have set up subsidiary offices in USA, China, Taiwan, Indonesia, Thailand, U.A.E, Turkey and the Netherlands. We also have distributors and agents in Korea, South-East Asia, and other countries.

**Large-space humidification unit ULM®**

Easy to move, Automatic operation (with humidity control, off-timer)

# Hisho Co.,Ltd

## About the company and products

We have a company history of 20 years in Japan and deal with the rental and the sale of the care article. In response to the requests from end users, we have developed an air cushion [PIARHYTHM] jointly with the Yokohama Synthesis Rehabilitation Center, and obtained certification of Welfare Tool Evaluation Center [JASPEC] in Japan. We have a favorable reception in Japan. In addition, we prepare antibacterial deodorant and alkali lavation, sell them with product names [SUMERUNDESU] and [SHOSYUROMAN] and exports them as well.

**PIARHYTHM II®**

### 1. Excellent body pressure dispersibility. To the extreme of comfort.

Air cushion disperses body pressure throughout. This greatly reduces the fatigue at the time of seating and the burden on sitting for a long time. Moreover, the sense of stability is excellent. The secret is that "AFC (Air Flow Control)" where the air gently moves.

### 2. Correcting the warmth of posture. I also suppressed left and right shaking.

Decision version of posture maintenance. Correct the backlash of the posture which is a heavy burden on the body and hold it in the correct position. I also suppressed the left and right sway seen by the air cushion.

### 3. Air adjustment is also easy.

Body pressure dispersion effect does not change so much due to difference in air volume. It is released from fine tuning of the air which was difficult.

### 4. Hygienic. Easy to wash.

Cushion is an antibacterial polyurethane which repels water. So, even if it gets dirty it can be washed easily, and it is always clean. Dedicated cover uses mesh material that is superior in breathability and less stuffy. Of course, laundry is also possible.

### 5. Lightness of surprise. Handling is very convenient.

PIARHYTHM II weighs only about 340g. It is much easier to carry and care.

## Deodorizer Roman®

Eliminates Airborne Virus and Bacteria with Oxidizing effect of Chlorine Dioxide gas.

- Effect
  - Virus Elimination
  - Bacteria Elimination
  - Deodorization
  - Mold Control

- There are 4 types according to the purpose.

- Stand type
- Fan type
- Portable type
- Spray type

## About the company and products

Honda has provided various products to offer the joy of mobility to the people. Honda Walking Assist device is a wearable robotic device for gait training which has been developed based on the research about bipedal human walking, seen as ASIMO.

During walking, the device senses the hip joint movements with hip angle sensors built in the left and right motors, and the control computer drives the motors to assist the forward and backward leg movements.

In Japan, Honda started commercial lease in 2015 only to corporations such as hospitals and rehabilitation or nursing facilities and the device is used for training to gait disorders caused by brain disease, orthopedic diseases, frail elderly and so on.

## About the company and products

Over 100 years since the foundation in the year 1916, we have been developing numerous physiotherapy products. Although our top quality products have been widely acclaimed in Japan, we are never satisfied with the current situation. Cooperating with both the international and national research institutes, we will continue to improve and develop new products to create a more age-friendly and healthier society. Our office will move in March 2018, so the address and phone number written on this directly will be changed.

To deliver high quality products, we are certified for ISO 13485 and the environmental management system policy ISO 14001. We have also passed the strict quality standards and specification such as CE marking, FDA and UL.

We have various physiotherapy products such as Electrotherapy, Ultrasound, Laser, Radio Frequency, Shockwave, Shortwave, Traction and so on. Electroacupuncture products are also in our product range.

“EU-941” 4-channel combination therapy unit. Combined use of electro-ultrasound therapy contributes to more efficient result

## Global activities

We have a deal with over 400 local agents in more than 100 countries. We normally distribute our products through local agents. However, we now have our local office in Shanghai and Hanoi, and will make factory in Vietnam within 2017. These facts show that we will accelerate overseas expansion more in the future.

“TM-400” Power traction unit. A user friendly model suited to a broader range of pathologies such as low back pain and spinal compression

## About the company and products

We were the first to launch a day service with overnight care, which is not fully covered by LTCI (Long-Term Care Insurance), and opened up our business to franchisees. One of our key programs, 「Sawa Honpo」 was well received as a business model and has grown into an industry leader in terms of number of offices.

The roles expected of us are likely to increase due to the central government's ongoing policy of integrated community care, which entails collaboration between healthcare and long-term care. Our challenge to provide an integrated community care system at a lower cost and to optimize our business model so as to enable a sound and sustainable social security system has started. Our dream is to expand our trailblazing care-service business model overseas, where it can become a real growth business. Our greatest challenge still lies before us.

---- realizing a society that will enable senior citizens, the sick, and disabled to live with dignity in their old, familiar communities.

【Sawa Honpo】 24/7/365 Day service facility  
An environment that uses a family-like feeling and small group setting  
A community-level foundation to support seniors with dementia

【Blooming Care】 24/7/365 Day service center with private rooms  
Offering the security of medical and nursing care  
Day service centers for seniors requiring intermediate-level care

## About the company and products

Our commitment to education had continued into the 21st century, by educating nurses who are well qualified and essential in health care services, while responding to changes in health care and society. In the recent years, complexity and advancement in health care services have been demanding nurses to have higher-level competencies to fulfill everexpanding roles and responsibilities. Based on our belief that college-level education is essential to fulfill those demands, we have established the Kameda College of Health Sciences with a Baccalaureate nursing program since 2012. Through four years of comprehensive and sophisticated professional nursing education in this program, we expect our graduates to play key roles in health care teams in the future.

## Global activities

(project in progress)  
Vietnam, China and other Asian countries

In collaboration with local medical institutions and/or nursing institutions, we are considering the establishment of educational courses specializing in elderly care, including rehabilitation and nursing knowledge and skills, with Japanese language in their local communities, and the development of international student programs in nursing institutions in Japan.

College of nursing (four-years course), Technical school of nursing (three-years course), midwife, Japanese language

About 590 students are learning in our educational institution.

## About the company and products

Magnesium has the feature of being lightest in practical metals. Meanwhile, magnesium is difficult to process, so its application range has been limited. We developed our own cold drawing technology and opened the way to the same processing as general metal. In addition, we have developed pipe bending and welding technology, and we are promoting the development of welfare and nursing equipments, which is a very light and strong magnesium that demonstrates its true value.

Specifically, we are developing welfare care equipment such as a cane, quad cane, wheel chair and so on, and ultra light chairs which are indispensable for aging society.

In addition to the characteristics of the material, we are developing unique products different from general welfare and nursing care equipment by enhancing design.

## About the company and products

MCS operates 286 nursing care facilities all over Japan. We have in particular 250 "Group Homes" providing specialized care for the elderly with dementia. As a leading company in dementia care, we strive against social problems such as rapid increase of elderly suffering from dementia in a super aging society.

## Global activities

We opened in December 2014 in Nantong, China our first nursing care facility (106 beds) which is now fully occupied. Following this first success, we have today a good track record for providing consulting services for Nursing Care projects and for Staff education services. In December 2017, we will open our second nursing care facility (150 beds) in Guangzhou. In Malaysia, our first small-scale nursing care facility will open in December 2017.

## About the company and products

In April 1989, under the Medical Foundation Kenwa-Kai, Nara Higashi Hospital was established. Nara Higashi Hospital specializes in medical care of the elderly. Based on the elderly policy of Japan, our company provides such as developing nursing care facilities, nursing homes, care houses for dementia patients, a small multifunctional facility, and visiting services such as nursing care, and rehabilitation care.

We are working to create a system which supports local residents comprehensively with these type of service. Since the establishment of variety of facilities, we have actively accepted the patients and severe dementia patients, these patients have difficulty in getting into facilities that meet the needs of a high-aged communities.

## Global activities

We have been actively accepting human resources from Vietnam, Indonesia and the Philippines in nursery and care fields. In May 2017, we concluded agreements with CAN-THO Medical College, TAY NGUYEN University, CICS, Medicare Network Cooperative regarding educational support of Japanese language. With this agreement, we hope scientific interaction on medical care based on Japanese language education will be available and many excellent Vietnamese staffs will have interest in Japanese language and nursing care.

## About the company and products

The revised immigration law last year has a provision to accept foreign nationals engaged in nursing care services. Foreign students who have studied for more than two years in Japan, and have acquired national qualifications for nursing care worker, can get permission to stay in Japan under the category of Nursing Caregiver. We will establish a comprehensive system to support foreigners who want to get a job in Japan and work in nursing care field. We will provide support so that they can study Japanese language and basic nursing care in their home country. We will provide comprehensive support, including the basic Japanese language education in their country, entering Japan, admission to Japanese vocational institutions, hospitals and assimilating in Japanese society. We will also provide support system to find employment after qualification is acquired.

## About the company and products

Moritoh Co., Ltd. is engaged in manufacture and sale by putting efforts into movement, transfer and walking, including nursing care lift 'TSURUBE' .

In recent years, we developed a safety suspension system, while keeping an unstable posture during walking, we can keep walking risk during rehabilitation walking to the minimum necessary, enabling safe and safe walking exercise.

The weight reduce lift (POPO) can stand up alone without a caretaker and can walk while losing weight lifted by a lift. Just like walking while holding around the waist from both sides, this system supports the body with the suspension arm. Also, when the balance collapses and it is about to fall, the suspension arm can support the whole body weight and avoid knee collapse (knee folding).

In recent years, we developed a safety suspension system, while keeping an unstable posture during walking, we can keep walking risk during rehabilitation walking to the minimum necessary, enabling safe and safe walking exercise.

Trainees will be able to realize walking exercises with improved walking motivation and increased amount of walking from a sense of security.

## About the company and products

1) Manufacture and sale of cooked food for nationwide elderly care facilities

When we manufacture/sell products, we always implement "high food hygiene level by vacuum cooking" and "creation of safe, secure and delicious menus" every 365 day.

2) Consultation service for kitchen innovation with our technology 「vacuum cooking」 + 「robot reheating」 Our kitchen innovation contributes to cost reduction. In one example, kitchen personnel cost was reduced by 50%, and water utility cost was also reduced by 30%.

3) Food distribution and safety confirmation service for houses of elderly people

We deliver meals for elderly people twice a day to their each house. At the same time, we also check their safety.

4) Supporting project for elderly people who have trouble with shopping

When we deliver meals, we can also provide following services ; shopping service on their behalf (for those have trouble with shopping), ride sharing service.

We offer dining at a calculated nutritional value by a full-time administrative dietician.

## Global activities

Planning to start sales of "Japanese delicatessen" in China from 2018.

After that, we are considering entering the care and welfare business (specialized in food) in China where the aging of the population accelerates.

Our management philosophy: To sublime "thank you" from customers to "deliciousness". Today we also offer meals with care to elderly care facilities.

## About the company and products

For over sixty years in Gifu City, we have introduced employment placement such as care workers and nurses to pay for employment. Utilizing the know-how we have introduced people to various workplaces so far, we are aiming for more global recruitment and exchange of human resources in the future.

In 2010, we started to operate dedicated housing for the elderly, accumulating know-how on providing nursing care services to the elderly and managing facilities.

Our affiliated organizations operate home-visit care services, day-care services and clinics.

We think that we can cooperate with your business towards the upcoming aging society.

(The homepage of the English version will be created in the future.)

	<b>TEL</b> : +81-3-6869-6595		<b>Language</b> : English		

## About the company and products

Next Sharing provides FRC educational programs in the Technical Intern Training Program (TITP).

After trainees return their home countries, Next Sharing will also give them opportunities that they can work in the elderly care field making full use of FRC that they learned in Japan.

FRC is a highly specialized care that elderly people in need of care can recover functions as much as possible through this care.

Japanese government is giving great attention to FRC as it has a lot of surprising achievements that many elderly people could get recoveries of their abilities, such as from bedridden to walking, tube feeding to eating meals orally, improvement in dementia, added that social medical cost could be reduced effectively.

We aim to realize a society where the elderly can spend their life independently and happily, therefore we train human resource who can implement FRC in the aging society, appealing validities of FRC in various Asian countries.

## Global activities

We have tied up with a human resource company and a medical college in Vietnam and started "FRC" education. Elderly care facilities implementing FRC in Japan have been ready for hiring human resources from Vietnam. We hope people from Asian countries to have FRC education and work for the elderly care facilities in Japan, and eventually they make elderly people recover and contribute to aging society in their own countries.

## About the company and products

Next Stage Japan Coop (NSJC), established in 1997, is a supervising organization of technical intern trainees from abroad.

We have accepted over 2,000 trainees into over 200 companies in Japan. The business category covers a wide range from fishing and fish-processing to construction and will extend into the care of the elderly. NSJC has the following advantages:

1. we accept trainees systematically every year; 2. we provide fulfilling Japanese language courses and social adjustment trainings in Japan before sending trainees to companies; 3. we provide sufficient guidance to companies and native-language counseling and assistance to trainees to protect them. As the result, our trainees remain in companies by overcoming trouble, if any; and 4. based on the thought of "trainees are community citizens," we serve to create rich multi-cultural societies.

Trainees: (from top) during a Japanese lesson in Vietnam; during a culture lesson in Bhutan; with a Japanese teacher; at a fish-processing factory

## Global activities

As of June 2017, NSJC is affiliated with licensed sending organizations in Viet Nam, the Philippines, Indonesia, China, Cambodia, and Bhutan (NSJC is the first organization to have accepted trainees from Bhutan). We intend to extend our affiliation to Bangladesh and other Asian countries.

<b>Contact information</b>	<b>E-mail</b> : global@nikken.jp <b>Contact person</b> : Makoto Toda, Ryoko Abe, Masaya Kohzu		

## About the company and products

Since its establishment in 1900, Nikken Group has been entrusted with almost 25,000 projects. In the field of health and welfare facility design, we focus on creating not just high quality architecture but also a comfortable, functional and efficient environment for both workers and end users.

Our process has been highly evaluated. We work to create a meaningful dialogue with our clients leading to the identification and detailed analysis of the underlying problem as a basis for providing specific workable solutions. In this manner, we have been awarded many accolades including the "Healthcare Architecture Award (Japan)" and numerous prizes related to environmental sustainability.

We are a "one stop service" providing solutions for the proper management of the facility as a sustainable economic resource at all stages of the project. This is from business planning, to spatial design and construction, facility operations and maintenance, to renovation, renewal, and business restructuring.

Wuxi Development Phase 2 (China)

## Global activities

Our aim is business development in China based on the experience and knowledge gained in the planning, design and consultation services we have offered on numerous elderly care facilities in Japan and various developments in China.

We also aim at business development in the field of health and elderly care facilities in ASEAN countries centering on Singapore where we currently are about to commence a project.

Currently, two projects are in progress in China. One project is in progress in Singapore.

Nippon Sigmoid is in the business of providing products and services that prevent, diagnose, treat, and heal locomotor disability and help people lead healthier and more comfortable lives. We are a leading company of this field in Japan.

**1. Pocket-sized Ultrasound Imaging Device "miruco"**  
Miruco is a simplified ultrasound imaging device specialized for a Point-of-care screening anywhere. Even Color-Doppler and Measurement have been downsized to design a compact device that can be easily used by anyone without a complex instruction (doctor, nurse, patient, etc).

**2. Medical Braces & Supports**  
Supporting the medical field with an emphasis on orthopedics.

Since Nippon Sigmoid was founded over 40 years ago, the company has aided the medical field as a top brand, mainly with braces and supports products for orthopedic use.

We continue to apply our extensive experience to providing products that help make daily living easier.

"miruco", the pocket-sized ultrasound imaging device designed especially for everyday Point of Care scanning.

## Global activities

We have 3 subsidiaries (in the U.S, France, and China) for sales and distribution. Our initial prioritized region for medical and elderly care products distribution is the Asian market, but not limited to any other market.

Currently, we are exporting supporting products to some Asian countries (China, Korea, Taiwan). While miruco hasn't been exported any country yet, we are on the process of applying for the medical device registration and promoting in some Asian countries.

"SIGMAX Braces & Supports" provide total support for various body parts and symptoms.

## About the company and products

Paramount Bed Holdings group began in 1947 as a manufacturer of hospital beds.

Following our corporate slogan of "As human, for human", we have always developed and serviced products that are safe and easy for anyone to use. Our business has broadened beyond hospitals, with products for facilities for the elderly, and for home care, and we have won an overwhelming share of the Japanese market.

In developing nursing equipment, we have expanded our product lineup from beds to include transfer equipment, rehabilitation support devices, and watching systems.

NEMURI SCAN is a sleep watching system that combines high-precision sensors with our unique analysis technology. The system can measure patients' sleep, heart rate and respiratory rate without attaching anything to them directly, allowing monitoring from care stations or other locations. Other than watching for sudden changes in patients' condition, it analyzes its observations to assist in raising the quality and efficiency of care.

NEMURI SCAN is a sleep watching system that combines sleep, respiration and heart rates. It assists in the quality and efficiency of care.

## Global activities

Paramount Bed Holdings has sales centers in nine countries and production sites in four countries, including Japan, and loyal customers in at least 100 countries. Applying the expertise that comes from our context in Japan's aging society, we are actively expanding our business in the global market, to serve facilities for the elderly and home care, as well as medical institutions.

Rakusho Z is a home care bed with super-low bed height and our original "Relax Motion" back elevation mechanism to support user's ADL and better QOL.

# POLARIS CO.,LTD

<http://www.polaris.care/>

<b>Address</b>	1-7-15, Isoshi, Takarazuka-shi, Hyogo 665-0033, JAPAN		
<b>Number of employees</b>	420	<b>Year of establishment</b>	1. Jul, 2002
<b>Products</b>	currently providing independence support type day care service		
<b>Categories</b>	<b>Elderly Care Products</b>		
	<b>Elderly Care Services</b>	● Day-care services	
<b>Contact information</b>	<b>E-mail</b> : info@polaris.care		

## About the company and products

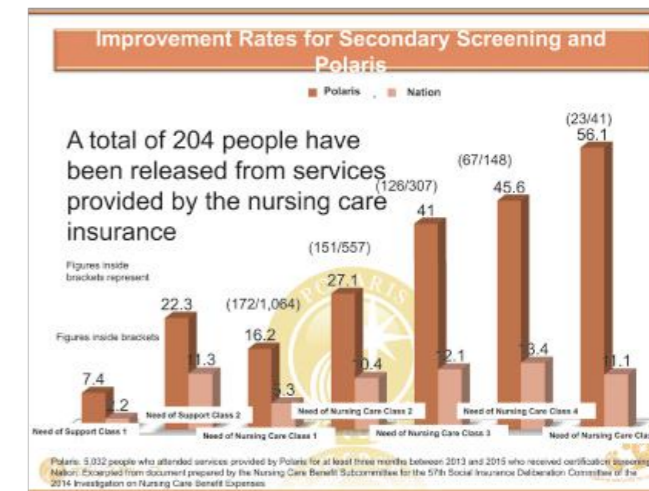

Polaris is currently providing independence support type day care service at 70 sites, primarily in the Kansai region and we are dominating the market. People who are interested in inspecting our services are welcome to visit and appointments are being accepted at all times.

I would like to give you a brief description of the nursing care insurance system in Japan before we get into our main subject. The system was established in 2000 and it is reputed to "aim for realizing a society wherein everyone can live in peace by supporting independence of elderly persons".

A certification screening is conducted every one to two years, based on which an individual is given a certification in one of the seven levels, ranging from the Certification for Need of Support Class 1 to Certification for Need of Nursing Care Class 5. Services are provided at home or at facilities based on such certifications.

Most nursing care actually being provided in Japan, however, are complementary type nursing care, referred also as domestic help type nursing care, which is about "doing house work on behalf of the patient", "shopping on behalf of the patient", "putting the patient in bath", "feeding the patient with meals" and the like through and through. This situation is a far cry from nursing care for supporting independence and the evaluation of nursing care insurance system in Japan is considered to be rated significantly low by other Asian countries because of this. While all this is going on, Prime Minister Shinzo Abe announced at the Future Investment Conference he himself presides on November 10th that "Nursing care in Japan from now on shall be promoted as a nursing care with an emphasis on the support for independence. A paradigm shift will be triggered."

This is the data on improvement rate by levels of nursing care required. The dark orange color represents data on Polaris, while the light orange color represents the data of the nation. As the data indicates, the improvement rate at Polaris is twice to three times in comparison with data for the nation. We refer to this as the "independence support nursing power". Next, please note that individuals requiring more serious care are more likely to improve.

## About the company and products

Riei Co., Ltd. is a life services business founded in 1980. As of June 2017, we manage about 440 facilities. Also, our another main business pillars is general nursing care services. We manage nursing care facilities nationwide across Japan. Including the scheduled opening in November 2017 of a Fee-based home for the elderly offering nursing care services, we will be managing 47 centers within the year. Our overseas operations began with our expansion into Thailand (Bangkok) in 2003. We are currently providing "Japanese-style nursing care" services to local elderly people in Thailand and China, adapting the good points of Japanese nursing care to the culture and customs of these countries. Moreover, in recent years, on the basis of our achievements in nursing care both at home and abroad, we have also been expanding our business in the areas of healthcare and food services. First and foremost among these initiatives is our business consulting service for the provision of care to the elderly in China, a service which caters to China's needs (including management and administration, outsourcing operations, and human-resource development).

## Global activities

- Bangkok, Thailand (2003※): management of a residential facility, home-visit care etc.
- China
  - 1) Beijing (May 2011; wholly-owned): management of a small-scale multi-purpose nursing home (October 2012-February 2017) China Headquarters Consulting service
  - 2) Shanghai (August 2012※): management of a residential facility
  - 3) Chengdu (August 2015※): dental business, management of a residential facility
  - 4) Nantong (November 2016※): management of a residential facility (Scheduled to open in 2017)
- Myanmar (September 2016※): caregiver training business ※: joint management

## About the company and products

Sakai Medical Co.,Ltd. ("SAKAImed") was founded in 1881. We have more than 135 years' history and experience in the fields of rehabilitation, social welfare and health care. As the manufacturer certified to ISO9001/ISO13485 standards, we are dedicated to providing high-quality products to the markets.

SAKAImed is specialized in three operations; Rehabilitation, Bathing Equipment and Preventive Long-Term Care operations. Besides, we have been promoting Sports Conditioning operation in recent years, thereby linking our operations to the improvement of QOL (Quality of Life) of many people and supporting the independence of the elderly and the disabled.

## Global activities

We have exported some products mainly to China, Korea and Taiwan. We are interested in exploring Asian aged-care markets for the future.

## About the company and products

Sakura Community Service founded in 2002, provides Regional Care Services in Japan. We have developed 3 businesses, "Senior Care Services", "Caregiver Training" and "Staffing Services" to revitalize our region. In the Senior Care Services, we are operating eight care facilities in Sapporo City and supports users with care rooted in the community. In the Caregiver Training, we are operating the "Japan Welfare Academy", which is a training school for senior care qualifications, cumulatively produced 15,000 graduates. In the Staffing Services, we are introducing human resources to senior care providers having difficulties in securing human resources, and in solving the industry problem. And also, we have developed the software which has the following three functions to provide standardized services even in countries where the concept of senior care services is not pervasive.

1. Function with voice input and translation
2. Automatic generation of care records
3. Utilization of care database

## Global activities

We began activities in Myanmar from 2014 and founded "Polestar KAIGO Service" for care personnel training in July 2015. In cooperation with Japanese government agencies such as JETRO, we have established a collaboration with local partners. The aging rate of Myanmar is not so high compared with other countries. Therefore, we position Myanmar as a base for human resource development to acquire the market in countries where aging is progressing, such as Singapore and China.

Classroom scene of Japan Welfare Academy

## Outline of our KAIGO software

Tablet app screenshot

Management tool screenshot

Available in four languages

**Characteristics:**

- Input via tablets (touch-screen interface) for efficient nursing care record keeping
- Automatic generation of nursing care plans using basic machine learning technology
- Voice input capability, multilingual service, including languages in Asia, where the population is rapidly graying

On August 28, 2015, we were accredited for the Ministry of Economy's New Collaboration subsidy program (designed to develop new business fields through collaborations between small and medium enterprises in different business fields).

## About the company and products

Japan now is experiencing super-aged society. Accordingly, Japan is pursuing changes in the social welfare area in order to meet the varying needs of people. Especially after the 2011 Great East Japan Earthquake, the local ties and connections were reconsidered and the attic life of the Showa Period came to attract attention again.

Not only live together like a family and respect the elderly people, but neighborhoods also help each other every time that something happens. That is the fundamental principle of "Familism" of SANGA Holdings, and is the spirit of "living together".

## About the company and products

We, Seahonence Inc., is a manufacturer of electric hospital beds and home care beds since 1957 in Osaka. Our one-stop service, "from developing to after-sales-service by our own company," is highly admired by a market with our high technology and user-friendly functions. We are the company certified JIS standard for both of medical and home care electric bed. Only two bed manufacturers achieved in Japan, and we are one of them. Moreover, our developing and designing capabilities were highly evaluated and won the Japan's Good Design Award in 2015. We are pleased to introduce our new high-quality home care bed "CORE Neo" on which we pursue user's comfort. Comfortable sleep for granted, we provide the caring function of knee-/ feet-raise for swollen legs.

Concerning the risk of falling, "CORE Neo" is designed for safety and comfortable natural uprising. With a hand controller, the operating raise is handily individually lockable, in case the user is not appropriate to use him/herself such as dementia person.

Our home-care bed "CORE Neo" is high-quality bed which created from our high respect for user-friendliness and comfort.

By folding the side rail holder underneath bed base, user can sit on the edge and uprise without minding outshoot around legs. It, not only the user but also for the caregiver, drastically reduce the risk of injury due to interruption of side rail holder.

## About the company and products

Our group company, Soshin Wellness, Co., Ltd., provides rehabilitation type day service.

For elderly people who are in need of nursing care, our professional staff including physiotherapists evaluate the current physical conditions accurately and provide each person with rehabilitation of the most adequate and effective training menu. We are also concerned about the burden on the family and offer rehabilitation of the high effect to maintain physical function to everyone so that nursing care will not prolong and not require another nursing care.

## About the company and products

This is a program that simulates the symptoms of dementia with VR technology.

Normally, experts and family caregivers may require years to master how to deal with people with dementia, or in worse cases, they are unhappily unable to acquire these skills even over a long period of time. But, by simulating the symptoms of dementia, anyone can master the right way of contacting people with dementia in a short time!

This program can be utilized in the following ways.

- Employee training for overseas affiliates trying to incorporate Japanese-style elderly care
- School education in aging developing countries
- Training of local staff employed by Japanese corporations who are trying to expand service deployment to abroad
- Education of local students who are learning nursing care with the aim of working in Japan

## Global activities

Currently, there are no overseas bases of operations for exporting or expanding this type of program.

We are interested in expanding our business to the countries that have rapidly aging populations and a significant interest in nursing care industry development in their own country (China, Thailand, Vietnam, Malaysia, Singapore, Indonesia etc.)

## About the company and products

Genkimura Group has developed over 40 Nursing care facilities in Japan since 1993, which means we are providing nursing care services to over 3,000 customers on a daily basis. Genkimura Group is one of leading social welfare corporations in Japan both in scale and in service quality. We are always challenging state-of-the-art nursing care for better service.

Genkimura Group has its own professional school for care workers to be officially qualified nursing care workers in Japan, where student can learn know-hows cultivated in facilities in our Group.

As for international relationships, we have widely accepted EPA and other students from outside Japan since 2010 (ex. Korea, China, Philippine, Vietnam) and they have been successful in various fields after graduate. More than 350 customers from overseas visited Genkimura Group last year to see our facility operation and management.

## Global activities

Genkimura Group is exporting "Nursing Care" mainly to South-East Asia in cooperation with partner companies in our Group. We are currently developing business in China in terms of nursing care technique and management know-how. Also, we accept trainees from overseas for nursing care.

In view of further expansion of Genki Group business overseas, we are positively participating in trade shows outside Japan such as in China, Thailand, Singapore, Taiwan, etc., to gather information and to get Genkimura Group know to others In Asia Pacific.

## About the company and products

Shinko Fukushikai has gathered know-how and experiences from various elderly care challenges over 30 years, including from our previous company. As Japan has entered a super-aged society ahead of the World, we have seen a rapid increase in visitors 400 in total seeking tours and training at our facilities. ASEAN visitors in particular have shown a high interest with 90% of total visits. We actively work with development and consulting on elderly-related businesses overseas through collaborations with a partner company. In China, we support the establishment of elderly care businesses by sending 3 experienced staff to share our management know-how and educational system. In USA, we opened "Encorepreneur Cafe" in Portland OR., aiming to create new life-styles for seniors, providing a co-working place and support programs for elderly to create jobs and social commitment by utilizing their skills and experiences. Shinko Fukushikai will continue to contribute to better solutions in the aged population era.

## Global activities

Consultation in setting up a new elderly care business in Nanjing, China, including staff and management training. Business development in Portland, Oregon, USA, creating new life-styles for active seniors by providing the co-working place "Encorepreneur Cafe" together with support programs, so that seniors can create jobs and/or their own social engagement opportunities.

## About the company and products

Sumitomo Forestry is incorporating into care nursing facilities its expertise in housing nurtured in the housing business, and the results of research conducted at its Tsukuba Research Institute into the physical and emotional effects of utilization of wood and greenery, such as the use of timber interiors.

Japanese society is aging at a pace which is unprecedented overseas, requiring an overall community care system that can deliver comprehensive support in housing, medical and other care, prevention, and lifestyle support.

Sumitomo Forestry aims to contribute to communities by providing reliable and comfortable living environments where the elderly can continue to live in the community they have lived long, and through the operation of elderly care facilities integrated into the local community.

## Global activities

In the Overseas Housing and Real Estate Business, we have recently been expanding the scale of our business through M & As and other measures, especially in the United States and Australia. At the same time, we will build a business model for the Housing and Real Estate Business in Southeast Asia.

## About the company and products

The pedal wheelchair, COGY/Profhand is the world's first proactive rehabilitation wheelchair, researched and developed by the Tohoku University Graduate School of Medicine in Japan. COGY/Profhand's concept is "Your legs still have hope to move again." COGY/Profhand to be able to actively move legs with paralysis or muscle weakness is used as a rehabilitation tool or a moving device by those who have walking difficulties due to complications from strokes, Parkinson's disease, spinal cord injury, cerebral palsy, or knee joint pain, but is not electrical powered device.

COGY/Profhand has earned the CE mark and FDA approval. Many medical institutions and welfare facilities in the US, Europe and Asia incorporate this product as a rehabilitation training device. For instance, COGY/Profhand has been evaluated by Copenhagen's health authorities and is approved as a recommended product, has stamp CPH Tested. TESS Co., Ltd. was the world's first company to commercialize pedal wheelchair Profhand/COGY and is a Japan-based designer and manufacturer of medical and welfare products focused on the neuromodulation technology!

COGY using aluminum alloy frame is lightweight and strong. Size is the same as the standard wheelchair. COGY have easily handling and high movement performance.

## Global activities

TESS is consulting and transferring mobility and rehabilitation technology with COGY to expand oversea through collaborative research and international cooperation.

Cooperative company HHJ Co., Ltd in Taiwan has been carrying out the business of manufacturing and selling oversea. There are some distributors in major cities in US, Europe and Asia.

## About the company and products

Tetsuyu group provides many types of services including home medical, healthcare ICT platform system in Japan and Singapore, and Uber-type medical professional matching service in Japan. In April 2017, we started telemedicine project with Fukuoka Medical Association and Fukuoka local government. In Singapore, we have developed CARES, which is a core care management application with a family of modules for different care settings and clinical needs / interfaces. This application is now tried in many facilities including community hospitals and day care centers. Now the Singapore system is going to be available in China. CARES is proud of five profiles as below.

- ACCESS:** Cloud Based system. 24/7 access to patient information and history, anytime, anywhere, all devices
- QUALITY:** Automation in clinical workflows and access to telehealth for quality and consistent delivery
- PRODUCTIVITY:** Automation in scheduling, route optimization, task management, document and image handling and telehealth to boost productivity
- CONNECTIVITY:** Seamless and real-time information sharing among care team for effective multi-disciplinary collaboration
- SECURITY:** HIPAA compliant privacy and security features. Availability of audit trail. Configurable role based access matrix

In Singapore, we are using humanoid robots to motivate and engage elderly at nursing home. CARES, which is fundamental information and communication tool are key to our services. Robots are integrated into CARES with seamless and integrated manner.

## Global activities

Tetsuyu Healthcare Holdings, Pte Ltd, is incorporated in Singapore. In 2017, it will go into China with local partners.

In Japan, we have developed online-medicine system, YaDoc. Patients can key in their symptoms according to their disease and the guidelines before seeing their doctors and/or at home. Their vital signs are automatically uploaded to the system. Doctors can consult patients based on these information and published medical knowledge, with high quality and better productivity.

## About the company and products

Yoshida was founded by Uhachi Yamanaka in Tokyo, Japan in 1906. At present, Yoshida is one of the oldest general dental equipment manufacturing companies in Japan. Our strength is "Creativity" as simply put. Once we come up with the new design, immediately we can incorporate the design into the product. Our strategy is simply, "we deliver".

### SAPOTA-KUN

Easy setup, light weight and compact design body position supporter for wheelchair patients-simply set it up on the wheelchair and it will gently support the patient's head and neck to stabilize the best posture for dental treatment. When the treatment is finished, just fold it in half and put it in the bag for easy carry.

Easy setup, Light weight, Compact

## Global activities

All countries

Intended to be used to support the body position of a patient in a wheel chair during the treatment.

## About the company and products

Since our founding in 1953, Tokyu Land Corporation has consistently pursued the creation of value with new real estate business. We have extended our business domains in response to changes in the times and social changes from the development business to the property management business, the real-estate agent business and, further, the retail business.

In the wellness business, focusing on senior and health-related demand, we provide comprehensive services ranging from home services to senior housing. We have opened up a senior housing facility by integrating the expertise we developed through many years of housing development and all the capabilities of our group. It offers individually tailored support to provide housing that enables peoples to enjoy their own lifestyles forever.

Setagaya Nakamachi Project Condominiums and senior housing

## Global activities

Tokyu Land Corporation entered markets overseas more than 40 years ago and began running a wide range of businesses. We are now opening up new business fields in rapidly growing regions, focusing on Indonesia, the United States, and China.

Further, Tokyu Corporation, our group company, runs real estate development in Vietnam, Thailand and other countries.

### About the company and products

ORALPEACE is an oral-care product created through joint research on anti-bacteria Peptide by industry academic collaboration with Kyushu University Agricultural Department, Kagoshima University Dental Department, National Center for Geriatrics and Gerontology. It has very strong effectiveness against oral problems, such as Cavities Periodontitis and Aspiration Pneumonia. Since it is 100% natural ingredient oral care product, it has no harm even if swallowed.

It is useful for the elderly and for anyone who has difficulty in gargling and in spitting out after cleansing their mouth. ORALPEACE will enrich their daily oral-care and prevent Cavities, Periodontitis, and Aspiration Pneumonia safely with low cost.

ORALPEACE is an innovative product by Japanese BioTechnology which contributes to the improvement of Quality of Life and decreases the burden and cost of elderly care. It is said that there is correlation between number of teeth and Alzheimer, Periodontitis and Systemic illness.

Based on Japan Bio-Technology. Contains anti-bacterial agent Neonisin. Safe for anyone including babies and elderly

### Global activities

Trife is Japan's first biotech company which contributes to both the improvement of quality of oralcare while also creating jobs for the disabled, currently expanding its business worldwide. Beginning with exporting Japan made product, it aims to localize manufacturing by working together with the persons with disability in the community.

### About the company and products

We plan, develop and sell the world's first excretion prediction wearable "DFree". The first machine, which began mass production in the spring of 2017, captures changes in the bladder by attaching the ultrasonic sensor to the lower abdomen, and sends the acquired data to the cloud. Then, we analyze the data with our own algorithm and inform the smart device etc. about the urine accumulation in the bladder and the timing of urination. As a result of the one-and-a-half years of field trials with the largest nursing care facilities in Japan and local governments, we have confirmed that we are able to improve the efficiency of excretory care work, reduce diaper cost, and improve the quality of life for care recipients. Since April 2017, we have started official implementation to "Sompo Care Next Inc.", one of the biggest nursing home provider in Japan. In the future, we will promote services for individuals such as visits and home care and overseas expansion.

Image of DFree device

### Global activities

Inquiries regarding the introduction of "DFree" have already been received from over 30 countries around the world. From June 2017 we also started demonstration experiments with the world's largest nursing care facilities in France. In future, we are considering overseas business in Europe, North America and Asia.

## About the company and products

Unicharm runs five businesses which are Baby care, Feminine care, Health care, Clean & Fresh and Pet care under the corporate philosophy "NOLA & DOLA" (Necessity of Life with Activities & Dreams of Life with Activities).

We offer the "Lifree" brand of products in Health care products that are tailored to the user's physical condition with the aim of providing the elderly with independence, dignity and freedom in their incontinence care, an important aspect of their daily lives.

We have been created new values, products and care system, to solve the adult incontinence problem for over 25 years in Japan. For example, We proposed the system use of using "Diaper + Inner pad" which can improve quality of life of bed ridden elderly person and care giver. We proposed "Self-Reliant Excretion" to those who can walk and stand, by offering Pants type diaper which name is "Rehabilitation Pants". We lead evolution of incontinence care in Japan.

"Lifree Pants" It is easily wearable and fits perfectly, worry free of leakage and lead positive daily lives for user.

## Global activities

Unicharm currently runs business in around 80 countries and areas including East Asia, Southeast Asia, Middle East and North Africa.

FY2016, ended December 31, Overseas sales was ¥410 billion. It accounted for around 60% of the Group's consolidated net sales.

We have positioned the fast-growing Asia region as its priority market. We have already built leading market shares in Baby care disposable diapers, feminine care products and adult incontinence care products in the region's key markets.

"Light incontinence pads" Odor-blocking polymers (\*) absorb urine in an instant, so no need to worry about leaks. (\*Prevents odor with ammonia.)

## About the company and products

For 20 years we have run medical and social care businesses. Now we are moving forward to establish "integrated community care system and local convivial society" in cooperation with administration. Our group provides total services; medical, rehabilitation and nursing care services, human resource cultivation, and construction. Product: 1, Career Pass System for care worker (Nursing Care Professional System)

This system has obtained a patent and is based on manpower training knowledge and skills gained in our nursing home business. It includes objective, reliable and valid Check List under the supervision of a professor. For nursing care staffs, this system pursue the efficient skill-up and career-up.

2, Overseas human resources developing system to make the best use of above system, we are supporting foreigners so that they can learn and master nursing care skills efficiently. A lot of photos and movies are used in our manuals so they can understand easily.

Career Pass System for care worker (Nursing Care Professional System)

## Global activities

We are conducting business operations in Vietnam, in order to develop human resources of medical care services. Now in Ho Chi Minh we affiliate with Japanese language schools and vocational schools, and implement the basic care skill guidance and Japanese language education for the purpose of being a care worker.

Furthermore we also support students study abroad. We can introduce a part-time-job at the nursing care office which support them financially.

In near future we will construct a nursing home so that Vietnamese can experience Japanese-style-nursing care.
