Inquiries

All parties interested in companies included in this directory should contact those companies directly.

For inquiries regarding this directory that are not related to specific companies, please contact the following:

JETRO Houston

inqu-hou@jetro.go.jp

Despite our best efforts to provide up-to-date and accurate information in this brochure, the Consulate-General of Japan in Houston and the Japan External Trade Organization (JETRO) Houston decline any responsibility for inaccurate, incomplete, or outdated information that may be printed in this pamphlet, and expressly disclaim any liability for errors or omissions in its contents. The Consulate-General of Japan in Houston and JETRO Houston are not liable for any damages which may occur as a result of using this directory.

Greetings

We would like to extend our congratulations on the publication of the Directory of Japanese Companies Located in Texas.

Over the last few years, the number of Japanese companies in Texas has grown rapidly. The pace has been especially quick over the last 5 years, with an average annual growth rate of 8%. The total number of Japanese companies in Texas increased to a record-high of 436, according to our own internal survey in 2019.

The main factor driving this growth is that Japanese companies are becoming more aware of and enticed by the phenomenal business investment opportunities provided by Texas: one of the fastest growing and largest markets in the United States, with all the advantages of a highly-skilled workforce, favorable geography, fully-developed industrial and transportation infrastructure, and business-friendly policies on issues like regulation and taxation.

At the heart of all of this work are the strong mutual partnerships that have been built with local Texas businesses. The vast majority of Japanese companies in the state take a win-win approach in their business plans, seeking to build strategic alliances with vibrant local companies where both sides play an active role in synergistically reinforcing the strengths of the other.

The warm support provided by local Texas communities is of course also a factor drawing Japanese businesses to the state. Local residents have been exceptionally welcoming to Japanese companies, and treat Japanese workers and their families as true members of the community. This atmosphere of harmony and mutual-prosperity lead to a sense of security, which in turn incentivizes even more Japanese companies to invest in the state.

The appeal of Texas has grown more and more apparent to Japan, as the state welcomes its companies and residents alike with open arms and a friendly “Howdy!” We would like nothing more than to nurture those bonds of friendship.

This directory was created with the aim of further expanding and deepening the partnership between Japanese and US companies; especially those in Texas. It was produced with the input of about 140 Japanese companies with operations in the state, compiling information on their activities and current status in an easy-to-understand format. Browsing the directory, one can conveniently learn about the wide range of fields Japanese companies in Texas are involved in, and gain perspectives on their positions in local markets, and even international markets across North and South America.

Traditionally, Japanese companies in the region focused on agriculture, and in more recent years, on energy like oil and gas, manufacturing, transportation, and service industries. However, lately they have greatly expanded their presence in high-tech fields that make use of the cutting-edge technological expertise that Japan is renowned for.

The year 2020 has been marked by major new challenges as the world faces unprecedented crises brought in the wake of COVID-19. These events have reframed priorities across the globe, placing new emphasis on sustainability and resilience in all aspects of society and the economy, especially in industries like energy, medical care, spaceflight and information technology.

Greetings

We are confident that these are the very fields where collaboration between Japan and Texas will most expand, as the companies of each region hold unique technological knowledge and capabilities that can open up new horizons of possibility if utilized together in cooperative partnership.

I would like to express my sincere gratitude to JETRO of Houston for taking the initiative to compile, edit and publish the massive amount of data that went into this directory. I also must give my deep thanks to the Japanese business associations in 6 major Texas cities and their constituent companies for the full cooperation they provided on this project.

I hope this directory will be seen by many companies across Texas, and serve as the seed for fruitful partnerships that will grow and ripen in the years to come.

福島秀夫

Hideo Fukushima
Consul-General of Japan in Houston

The Japan External Trade Organization (JETRO) is a government-related organization with a global network spanning over 40 domestic offices in Japan and 70 regional offices in other countries around the globe. Using this network, JETRO contributes to the expansion of trade and investment between Japan and the rest of the world by making new connections; business-to-government, business-to-business, and person-to-person.

JETRO Houston was founded in 1969, the year when mankind first landed on the moon, and has actively promoted business relations between Texas and Japan in the 50 plus year that followed.

Japanese companies have more operations in Texas than those of any other foreign nation, and we continue to work toward building even greater cooperation between them and local companies.

We have created this directory in response to the many local governments and businesses in Texas seeking the technological insights and capabilities of Japanese industry. Please feel free to contact any companies that interest you and further expand your business dealings with Japanese companies.

I wish you all business success.

Following the "Inspiration of Japan" high quality of service, ANA has been awarded the respected 5-Star rating every year since 2013 from SKYTRAX. ANA is the only Japanese airline to win this prestigious designation eight years in a row. Additionally, ANA has been recognized by Air Transport World as "Airline of the Year" three times in the past 10 years - 2007, 2013 and 2018, becoming one of the few airlines winning this prestigious award for multiple times.

ANA Houston route aim to provide our customers with greater choice and flexibility for destinations and travel schedules. As a key market for the U.S. oil and gas industry, expanding service to Houston—the tenth North American destination since June 2015 for ANA—emphasizes our desire to make travel more convenient. Additionally, this Houston route will allow us to improve access between Asia and Latin America.

ANA is confident that this new route from Bush Intercontinental to Tokyo Haneda will create ease and convenience for all our passengers. In addition, ANA is committed to ensuring the comfort and safety of all its valued passengers and our employees by providing customers with clean and hygienic environments in airports, lounges and onboard aircraft through "ANA Care Promise", our new standard for air travel. We will continue our efforts to ensure the safety and comfort for all passengers flying with ANA.

Company and Product/Service Overview, Activities in Texas

Bear Child Education Academy is a Japanese-style early childhood classroom for children age three to six. We are open for kindergarten classes, preschool classes, after class, and Saturday classes. Bear Child Education Academy is a subsidiary of Kuma Education Center. We are licensed as a group in Kansai for kindergarten and preschool and operate a cram school. We have 48 years of experience in early childhood education in Japan, and we send many of our students to acclaimed private elementary schools in Kansai.

Twice a week, children in kindergarten classes learn fundamental Japanese manners through various forms of “play” in group living and foster the traits needed for making friends. The early childhood classroom tackles physical education and mental education, numbers, and printing letters. Through group play, children engage in following rules and fostering a sense of cooperation and empathy. In after class, which is aimed at children who have finished precare, a program identical to the kindergarten class takes place. In Saturday class, children who cannot attend on weekdays participate in kindergarten or preschool class.

Conversations typically take place in Japanese, but English support is available if Japanese is difficult. The precious heart of Japan, culture, and customs, as well as early childhood education. It is very important to learn these things during early childhood, when human brain development is most active. We believe that our mission is teaching the heart of Japan to children in Houston, USA through Japanese education with proven results in Japan.

Company and Product/Service Overview, Activities in Texas

Chiyoda is a global engineering company providing innovative and integrated solutions to promote energy transition and a sustainable world.

We provide engineering, procurement and construction (EPC) services and technologies for energy facilities (LNG/gas, refining, chemicals), environmental, pharmaceutical/bio, renewables (hydrogen, solar, energy storage), and other industrial facilities.

We provide advanced engineering and digital solutions to optimize and solve today's global challenge such as the reduction of greenhouse gas emission and increasing production for better economics.

In Texas, we have been engaged in Front End Engineering and Design (FEED) and EPC services mostly for energy facilities in North America. Currently we are designing and constructing a world class LNG export facility in the Port Arthur area and an ethylene and utility facilities in Corpus Christi.

Year of Establishment	<Texas> 2019 <Japan> 1976	Contact Person in Texas	Satoshi Ikeda
Annual Sales	<Texas> - <Global> -	Texas TEL	281-258-4752

Company and Product/Service Overview, Activities in Texas

Established in 1987, Gakkyusha U.S.A. Co., Ltd. is a wholly owned subsidiary of Gakkyusha Co., Ltd. d/b/a "ena," that provides an educational program for Japanese pupils aged between 3 and 18 years. Gakkyusha U.S.A. opened its first school in the United States, ena New York, in April 1987. In 2019, we operate 12 schools in seven different states in the United States: New York, New Jersey, Illinois, California, Michigan, Maryland and Texas.

There are tens of thousands of Japanese families living in the U.S., particularly the East Coast, West Coast, and Mid-West. Because of the major differences in the methods and goals between Japanese and American education systems, the children of these families are confronted with great difficulty upon returning to schools in Japan.

Although Japanese children generally adjust well to American schools when they move to the U.S., the opposite is not true upon return to Japan. Thus, especially given the differences in educational goals and methodology between the two education systems, the looming return to Japan has caused great concern to those Japanese parents whose children have been removed from mainstream Japanese education for some time. To fill this need for supplemental Japanese education, we have established preparatory schools that will provide a Japanese educational program for Japanese pupils temporarily living on the East Coast, West Coast, and Mid-West. Our program parallels the curriculum they would have received had they remained in Japan.

Evaheart, Inc. ("EVI") is a medical device company based in the Texas Medical Center of Houston. EVI was established to gain regulatory approval and commercialize the EVAHEART®2 Left Ventricular Assist System in the North American market and start distribution in Europe. Under an FDA-approved IDE, a bridge-to-transplant (BTT) or Destination therapy clinical trial (COMPETENCE TRIAL) of the EVAHEART®2 LVAS is currently ongoing in the US.

Goodman Global, Inc. (Member of Daikin Group)

Japanese HQ	DAIKIN INDUSTRIES, LTD	Industry Classification	Manufacturing
Website	https://www.daikin.com	Corporate Form in Texas	Factory
Texas Address	19001 Kermier Rd, Waller, TX 77484	Email in Texas	yukiko.yokota@goodmanmfg.com
Number of Employees	<Texas> 7000 <Global> 80369	Corporate Function in Texas	U.S. HQ
Year of Establishment	<Texas> 1975 <Japan> 1924	Contact Person in Texas	YUKIKO YOKOTA
Annual Sales	<Texas> - <Global> 2,550.3 billion JPY (2019.4~2020.3)	Texas TEL	713-759-9595 (ext 300)

Company and Product/Service Overview, Activities in Texas

Daikin is a worldwide leader and provider of advanced, high-quality air conditioning and heating solutions. Daikin manufactures and sells a complete line of energy efficient, intelligent heating and cooling systems for homes, residential buildings, and high-performance commercial buildings.

In 2012, Daikin Industries, Ltd. acquired residential HVAC manufacturing leader Goodman Global Group, Inc. for \$3.7 billion. In 2013, Goodman integrated with Daikin Air Conditioning (Americas), an innovator in ductless air conditioning that developed groundbreaking VRV technology, to begin local production of multi-zone air conditioners that were previously imported, as well as the manufacturing of commercial products.

North America is the largest air conditioning market in the world, accounting for approximately 20 percent of global air conditioning usage. While Goodman's ducted products constitute the bulk of HVAC sales, emerging environmental awareness and energy saving regulations in the United States have increased the need for Daikin's ductless products with high energy saving performance capability.

The fusion of Goodman's robust sales system, streamlined logistics and sales network with Daikin's energy saving technology supports a commitment to elevating the quality of air in homes, businesses and public spaces as we aim to create new trends in energy efficiency through innovation, sustainability, environmental stewardship and business expansion.

Company and Product/Service Overview, Activities in Texas

In 1953, Fuji Trading started as a marine supplier providing ship's stores, provisions etc. to ships visiting Japan from various countries. Since then for over 60 years, Fuji Trading has greatly contributed to the world marine business by developing IMPA Catalogue which became the 'Bible' for marine suppliers all over the world and through expanding service fields with establishment of Machinery Services Div. and Techno-Network Div. Now we enjoy No. 1 reputation in both name and reality. By taking advantage of the world-wide network and wealth of knowledge about world's articles fostered through marine supply, we created a new trend in Japanese domestic market, and imported liquors, food stuffs, brand name products which we handle, greatly support our company. Further, in addition to the conventional business, we have entered into land fields supplying machinery and equipment to plants in many countries.

Hitachi Zosen U.S.A. Ltd. (HZUSA), the U.S. subsidiary founded by Hitachi Zosen Corporation in 1979, has its origin in the office established in 1956 in New York. The company performs sales, customer support and market research of process equipment, tunnel boring machine and the transport/storage cask for spent nuclear fuel.

Hitachi Zosen Corp. boasts a solid track record in process equipment with its major plant, Ariake Works (Kumamoto), manufacturing for facilities such as fertilizer plants, refineries and LNG plants. The company's welding technology is among the best in the world and has realized production of high-temperature, high-pressure reactors from vanadium-enhanced chrome molybdenum steel.

In the nuclear field Hitachi Zosen Corp. has over 40 years of experience especially in the transport/storage cask markets. The company has delivered more than 850 units of casks and canisters in US and Japan since its first delivery in 1978. In 2013, the company acquired NAC International Inc, an industry-leading provider of engineering and nuclear fuel management solutions for nuclear facility operators, fuel cycle companies and government agencies. Furthermore, products and services of Hitachi Zosen group company in US range from press machines for automobile industries, ultra-high vacuum valves, rapture disk and the technologies, solutions, services related to Energy-from-Waste plants.

Annual Sales	<Texas> <Global> JPY 971,389 million FY end in March 31, 2019	Texas TEL	713-850-8480

Company and Product/Service Overview, Activities in Texas

INPEX Americas, Inc. (formerly Teikoku Oil North America) was established in 2003 as a US subsidiary of INPEX Corporation, Japan’s largest upstream oil and gas company. Since its inception, INPEX Americas has been engaged in oil and gas exploration and development activities primarily in the US Gulf of Mexico. In 2012, INPEX Americas joined the Lucius deepwater project offshore Louisiana in the US Gulf of Mexico, which has continued to operate successfully since the start of production in 2015. In addition, INPEX Americas acquired stakes in the Eagle Ford shale play in 2019 through its wholly-owned subsidiary, INPEX Eagle Ford, LLC. INPEX Eagle Ford owns and operates assets covering more than 10,000 acres, primarily in Karnes County, Texas. As all crude oil and natural gas produced from these assets is sold in the local markets, INPEX plays a role in ensuring stable energy supply to the local community. As of September 2020, INPEX Americas has approximately 50 employees, approximately half of which are based in Houston and responsible for administrative work, crude oil and natural gas marketing, business development and US market research. The other half is based in San Antonio and responsible for the drilling, completions and production operations for the Eagle Ford assets as well as associated HSE, land management and development planning. INPEX considers the US to be a country/region with great business potential that could be positioned as one of its core business areas, and is actively seeking both organic and new business development opportunities in the country.

Annual Sales	<Texas> - <Global> -	Texas TEL	281-333-5999

Company and Product/Service Overview, Activities in Texas

The Japan Aerospace Exploration Agency (JAXA) was born through the merger of three institutions, namely the Institute of Space and Astronautical Science (ISAS), the National Aerospace Laboratory of Japan (NAL) and the National Space Development Agency of Japan (NASDA). It was designated as a core performance agency to support the Japanese government's overall aerospace development and utilization.

JAXA, therefore, can conduct integrated operations from basic research and development, to utilization. The JAXA Houston Office, which covers the southern area of the United States, serves mainly as a liaison office with the NASA Johnson Space Center (JSC). The JSC manages manned space programs, for which the JAXA Houston Office offers an extensive range of assistance, including the training of astronauts and the development and operation of the International Space Station.

Company and Product/Service Overview, Activities in Texas

JOGMEC, or Japan Oil, Gas and Metals National Corporation, is a government-related organization that collaborates with governmental agencies and companies both at home and abroad with a view to secure stable supplies of natural resources and energy for Japan, while contributing to the development of resources and energy business worldwide as the duty of a large energy-consumption nation. To contribute to dynamic development of natural resources and energy, JOGMEC's main areas of responsibility are oil and gas, metals, coal and geothermal.

JOGMEC joins hands with Japanese private companies in each of these areas at various phases of projects through geological surveys, technological development, financial support, stockpiling, environmental protection, and gathering and provision of information, to name just a few. International cooperation and collaboration are also at the forefront of JOGMEC's activities, which are designed to contribute to the stable supply of natural resources and energy, indispensable for the national livelihoods.

JOGMEC Houston office is responsible for survey trend of oil and natural gas industry in the north, central and south American countries.

Annual Sales	<Texas> - <Global> 3,280 Billion JPY (FY2019)	Texas TEL	713-980-4140

Company and Product/Service Overview, Activities in Texas

JERA Americas Inc. is a subsidiary of JERA Co., Inc, the largest power generation company in Japan, producing one third of Japan’s electricity. As a group, JERA operates a wide range of energy businesses around the world, from extracting and transporting fuel resource to generating power and selling electricity and natural gas.

North America is one of the core markets for the JERA group. JERA Americas manages power and fuel related businesses in the Americas mainly from the Houston office.

Currently 16 thermal power plants in the US and Mexico have investment from the JERA Group and managed by JERA Americas. Development of renewables business is also a focus.

For fuel business, JERA participates in an offtake LNG from the Freeport LNG Project which is located on Quintana Island, Texas. Commercial operation began in December 2019, and we will continue to export LNG to global destinations including Japan for the next 20 years.

Company and Product/Service Overview, Activities in Texas

JETRO, or the Japan External Trade Organization, is a Japanese governmental organization that works to promote mutual trade and investment between Japan and the rest of the world.

JETRO Houston was established in 1969, the year the world was thrilled by mankind first landing on the surface of the moon. For more than 50 years, we have helped connect businesses in Texas and Japan.

If you're thinking about doing business with Japan, our motto is: talk to JETRO First.

- We convey the appeal of doing business in Texas, and cities throughout the state, to Japanese companies. We also support Japanese companies entering Texas.
- We support Texas companies related to new technologies, cutting-edge industries, life sciences, renewable energy, and other innovative technologies or ideas to enter Japan.
- We support Texas companies interested in open innovation with Japanese companies.
- We introduce Texas companies interested in selling Japanese agricultural products, alcohol, daily necessities, or similar goods that are increasing in popularity in the US to Japanese partners.

Company and Product/Service Overview, Activities in Texas

Established in 1989, JX Nippon Chemical Texas Inc. ("NCTI") has been conducting business for more than 30 years here in Houston, Texas. Among ENEOS group companies, what makes us stand out most is that NCTI focuses on manufacturing & global marketing our specialty chemical materials to industrial customers.

NCTI has mainly two material categories, both of which are manufactured by utilizing proprietary technology developed by ENEOS. The first one is Specialty Aromatic Solvent ("SAS"), which is used for various industrial applications including capacitor fluid, heat transfer fluid, and compressor wash oil. The second one is Ethylidene Norbornene ("ENB"), which is mainly used for special rubber application in automobiles.

If you are interested, please contact our Global Sales Manager, Mike Sexton(msexton@jxncti.com). We consider it highly important not only to supply value-added materials to customers, but also to contribute to our society by developing new products for realizing better lives in future.

Company and Product/Service Overview, Activities in Texas

JX Nippon Oil & Gas Exploration is a principal operating company of ENEOS Group. ENEOS Group's mission to society is to provide stable energy, resources, and materials. JX Nippon Oil & Gas Exploration is engaged in upstream business with oil and gas-producing countries across the world.

In the US, we have interests of some oil and gas fields in continental shelf locations to deep water areas in the Gulf of Mexico and onshore. In 2014, we launched the CO₂-EOR (Enhanced Oil Recovery) project as a joint venture with NRG Energy Inc, one of the leading electricity producers in the US. The project involves the capture of CO₂ in the flue gas from a coal-fired power plant in Texas, and the injection of the CO₂ into an oil field to boost production.

Company and Product/Service Overview, Activities in Texas

With top-of-the-line research and production facilities located worldwide and a global supply network, Kuraray leads the industry in producing specialty resins, film, elastomers, fiber, and dental materials found in many everyday consumer goods.

Our U.S. headquarters is located in Houston, TX, with four production facilities throughout the region. We established our first plant, the EVAL™ (ethylene vinyl copolymer gas barrier resin) facility, in 1986. EVAL™, a resin with barrier properties that excel against the permeation of gases and prevent leakage, is an effective and efficient material for food packaging, automotive gas tanks, wallpaper, and more. In 2002, we opened our SEPTON™ plant. This thermoplastic rubber is known for its high tensile strength and elasticity. It is used in a wide range of adhesive, sealant, and coating applications, such as tapes and food packaging, and industrial and construction industries. The KURARAY POVAL™ (polyvinyl alcohol resin) plant opened in 2008. Kuraray acquired Vinyl Acetate Monomer (VAM) and ELVANOL™ (polyvinyl alcohol resin) from DuPont in 2014. The polyvinyl alcohol resins provide unique characteristics to their applications, making it excellent in household and industrial products. The resin has many derivatives such as TROSIFOL™ PVB Film, a structural and functional interlayer film for automobile windshield and building windows, Kuraray POVAL Film for LCD polarizing plates for TV, PC and mobile phones, and PVA watersoluble, biodegradable film for unit-dose applications, and KURALON™ fiber for various industrial applications. The Kuraray Group is committed to developing new business fields using pioneering technology that improves the environment and enhances the quality of life throughout the world.

Kureha America Inc. is a holding company of Kureha U.S. Group, which consists of two subsidiaries — Kureha PGA LLC, manufacturing Polyglycolic acid (“PGA”) and Kureha Energy Solutions LLC, selling degradable downhole tools used in oil and gas fields.

Kureha America Inc. also has a function as a trading company that sells a variety of chemical products manufactured by our parent and affiliated companies. Our product portfolio includes Seaguar (Fluorocarbon Fishing Line), Microspheres, Carbon Fiber, Krehalon (Food Packaging) and KF Polymer (PVDF). We have operated our own warehouse in KY since 2018 in order to improve customer satisfaction.

In addition, Kureha America Inc. has recently launched a new team called “New Business Creation Team”. The goal of the team is finding innovative businesses in various industries such as Energy, Life science, Agricultural etc. by collaborating with universities or companies with state-of-the-art technology.

Year of Establishment	<Texas> 2016 <Japan> 1944	Contact Person in Texas	Satoshi Tojo, President and CEO
Annual Sales	<Texas> - <Global> -	Texas TEL	713-893-0730

Company and Product/Service Overview, Activities in Texas

Kureha Energy Solutions LLC has been established as a joint venture between Kureha Corporation and JGC Holding Corporation. Our mission is to market and to sell Kureha's downhole tools for oil & gas industries, including polyglycolic acid (PGA) frac plugs, in the Americas. Headquartered in Houston, Texas, we have multiple representatives and warehouses in major shale plays area. An outstanding feature of our products is the degradability. While conventional tools made of non-degradable materials need to be removed from the well after usage, our products degrade in the well.

We contribute to oil & gas operators significantly, generating an extra value by reducing cost, time and risk during the well completion process. Moreover, we provide technical support and services to ensure the products are used suitably at well locations.

Collaborating with Kureha Corporation, who manufactures and assembles our products, we are continuously gaining an exceptional reputation for such services based on our specialized technical knowledge.

Since 2016, we have enhanced presence in downhole tools market by our in-depth marketing activities and technical services.

We, as Kureha and JGC group company, will continue contributing our unique value to the energy industry by taking advantage of our integrated innovation from raw materials to tools.

Mayekawa is an industrial compressor manufacturer that has paved its way into various industries from food to energy and Oil & Gas. With over 150 locations worldwide, Mayekawa has a true global network to provide our products and services anywhere in the world. Our products include industrial refrigeration and gas compressors, custom-build compressor packages and systems, as well as OEM parts.

Mayekawa's Chemical Process Division specializes in providing such products and services to the Oil & Gas and Chemical markets. Houston is the sales, engineering and service center of Mayekawa Chemical Process Division in the United States. In Houston, we provide added value to our products by providing quality parts, service and support to the Mayekawa manufactured compressors and systems. On top of sales and engineering, we offer field service consulting and repair in the following energy industries or industrial plants and facilities: refineries, chemical plants, offshore facilities, HY/CO plants, NGL plants, landfill gas plants.

Mitsubishi Corporation (Americas) is a wholly owned subsidiary of Mitsubishi Corporation, a global integrated business enterprise with 10 business groups that operate across virtually every industry. These include natural gas, industrial materials, petroleum & chemicals, mineral resources, industrial infrastructure, automotive & mobility, food industry, consumer industry, power solution, and urban development.

Mitsubishi Corporation has had a presence in the United States since 1954, when Mitsubishi International Corporation ("MIC") was incorporated as a wholly-owned subsidiary of Mitsubishi Corporation. In 2012, Mitsubishi Corporation (Americas) ("MCA") was established as the US holding company for MIC and other MC Group companies in North America.

Through its various business groups and subsidiaries, MCA engages in strategic investment and global trading of industrial and consumer products.

In Texas, we have a long history of doing business in the natural gas and petrochemical fields, and in recent years have expanded that business also to other fields. We roll out our business from Texas with subsidiaries such as Diamond Gas North America Corporation, CIMA Energy, LLP (Natural Gas), Sesaco Corporation (Food Industry), Diamond Realty Investment Inc. (Urban Development) and more.

Company and Product/Service Overview, Activities in Texas

Mitsui & Co. (U.S.A.), Inc. (“Mitsui USA”) is the largest wholly-owned subsidiary of Mitsui & Co., Ltd., a diversified global trading, investment, and service enterprise headquartered in Tokyo, Japan. As the US subsidiary of Mitsui & Co., Ltd., Mitsui USA is engaged in business investment, project development and management, capital goods leasing and technology transfer, in addition to traditional businesses of a sogo shosha (general trading company) such as import, export, off-shore trade and domestic wholesale.

The Houston office is the second largest Mitsui USA office after the headquarters in New York City. The office plays a significant role in supporting and expanding businesses, especially in energy, chemicals, steel, and mobility industries, sometimes in close alliance with Mitsui & Co. group companies.

For example, the energy division aims at providing a steady energy supply by developing value chain from upstream to downstream. The chemical division trades and distributes basic petrochemicals (e.g. olefins, aromatics, and industrial chemicals), chlor-alkali, and methanol. The steel division engages in energy-related steel (e.g. pipe, plate) and construction-related steel (e.g. hot rolled coil). The mobility business division promotes a steady supply of transportation infrastructure with global business partners in the fields of shipping, aviation, space and rail.

Year of Establishment	<Texas> 2002 <Japan> 1884	Contact Person in Texas	Hiromi Okase
Annual Sales	<Texas> - <Global> -	Texas TEL	-

Company and Product/Service Overview, Activities in Texas

MOL Houston is mainly engaged in energy transportation including operations and business development in North and South America.

The LNG/Offshore team, as a local base for US Shale Gas transportation, serves valued customers providing support to vessel operations and maritime technical information. The team also develops small scale LNG transportation and LNG bunkering business. For offshore business, with experience and expertise accumulated through energy transportation, we develop FPSO (Floating Production, Storage, and Offloading) business and FSRU (Floating LNG Storage and Regasification Unit) business, mainly in Central and South America.

The Tanker team offers transporting crude oil, petroleum products, LPG, methanol, and related customer service, operational support, and develops new business.

2 group companies are in the same office: MOL Chemical Tankers America, which handles ocean transportation of liquid chemical cargoes, and Nippon Concept America, which provides intermodal transportation of liquid chemical cargoes using ISO tank containers. As MOL group, we are offering wider range of requirements for our customer to transport liquid chemicals.

We will be developing renewable energy related businesses, mainly where our expertise and experience as a shipping company can contribute.

Company and Product/Service Overview, Activities in Texas

NIPPON EXPRESS USA was established in 1962 as the first overseas subsidiary of Nippon Express. For nearly 60 years, we have provided comprehensive transportation services including Air and Ocean Import/Export, Warehousing, Trucking, and Moving services. Since 1975, we have locations in Laredo, McAllen, and El Paso along the Mexican border, in addition to Dallas, Houston, and San Antonio. We are expanding our business through a network of six locations, the largest number of locations among Japanese logistics companies. Each location has its own warehouse, a total of 276,000 SQF, and provides high-quality logistics services through in-house systems and extensive training. We operate shuttle trucks that connect two major international hubs, DFW and IAH Airports, to various cities in Texas, providing a speedy Air cargo transportation network. In ocean freight forwarding, we provide our own transportation services which cover Port of Houston, West Coast, and East Coast in all directions. Utilizing our network of strengths, we operate daily milk-run trucking services between San Antonio, the center of the Texas automotive industry, and automotive suppliers in various Midwest cities, as well as cross-border trucking services to Mexico. Nippon Express has logistics capabilities to support your business in Texas, the U.S., and globally.

NIPPON STEEL CORPORATION is established in 2012 through a merger between NIPPON STEEL CORPORATION and Sumitomo Metal Industries, Ltd. We have had a history of steelmaking that extends for more than 150 years.

We have every intention of becoming the unrivaled Best Steelmaker by enhancing and implementing the company characteristics of "technology," "cost," and "being global".

We are a business holding company with five business segments: steel, engineering, chemicals, new materials, and system solutions.

Our steel segment produces seven major steel products: pipe & tube; flat products; bar & wire rod; plate; construction products; railway, automotive and machinery parts; and titanium & specialty stainless steel. Our pipe & tube and plate business are a major world player in its field with its advanced technologies and superior services, especially in the energy sector, which includes oil & gas development and power generation.

In Houston, we are working to contribute to the supply chain of the energy industry, including oil majors. In addition, we have offices in New York and Chicago in the U.S. to serve the automotive industry supply chain. Our company will pursue world-leading technologies and manufacturing capabilities, and contributes to society by providing excellent products and services.

Company and Product/Service Overview, Activities in Texas

Since its establishment in 1985, Pasona N A, Inc. has offered support for the maximization of business efficacy for Japanese-owned companies operating in the U.S. together with job seekers, businesses operating in the U.S. and our own staff. This support has been offered through the four main pillars of Human Resource Solutions, Business Process Outsourcing, Business Process Reengineering and Knowledge Process Outsourcing.

Our mission is to support Japanese-owned businesses operating in the U.S. as much as possible, and to play a role in their success. As a business outsourcer with specialized knowledge in the areas of human resources, accounting, payroll and resident employee management in the U.S., we make contributions to customers by increasing the efficiency of their operations, cutting costs and allowing them to focus on their core business. Moreover, looking to make contributions to the further globalization of Japanese-owned companies, we offer support utilizing the global network of the Pasona group through the introduction of talent across borders, the design and implementation of comprehensive U.S. hiring processes and the acquisition of fresh talent with bright futures.

Company and Product/Service Overview, Activities in Texas

In 1896, the founder of the Satake Corporation, Riichi Satake, invented and began the production of Japan's first power driven rice milling machine.

In the subsequent one hundred years, a succession of successful developments and a wealth of accumulated research and knowledge have made Satake the world leader in grain processing systems. Satake produces a comprehensive range of individual machines, integrated systems and totally engineered solutions for the processing of rice, wheat and other grains.

The Company is proud of its tradition of innovation which ensures that Satake machines and systems are always at the forefront of technology.

Satake has achieved its position as the oldest, largest and most advanced company in its fields through its commitment to offering customers superb equipment, specially developed to meet their needs. This driving principle has led directly to the prosperity of the Company.

We are most grateful to all our customers for their patronage which has allowed us to become known and respected in Japan and over 150 countries throughout the world.

Satake USA provides sales and service to the Americas, from Canada to Argentina.

Our Vision Systems (optical sorting machines) operation is represented by our Houston, Texas corporate office and by divisions located in Modesto, California and Manchester, England. From these various locations, shipments of optical sorting products are made and sent to all parts of the world.

Satake USA also provides engineering and design consulting services used by the rice processing and cereal milling customers."

Annual Sales	<Texas> \$600 million (FY2020) <Global> \$31 billion (FY2019)	Texas TEL	713-466-0277

Company and Product/Service Overview, Activities in Texas

In 1977, Toshiba International Corporation established its corporate office and main campus on the corner of Eldridge and West Little York in Houston, Texas. A prime location within 10 miles of the Energy Corridor, TIC covers over one million square feet of manufacturing with auxiliary facilities around North America.

Four main divisions - Motors & Drives, Power Electronics, Automotive and Solution Products – research and develop industrial products covering industries such as oil and gas, utilities, datacenters, renewables, HVAC, water/wastewater, food, mining and railway to name a few.

TIC has a proven history of putting the customer first and understands that quality of service is as important as the product. Teams from sales, field service, and customer service strive to ensure ease of business is top-of-mind when engaging with customers. The national sales force logs thousands of miles each year making in-person visits to even the most remote industries to build relationships. Customer service reps are standing by, even in the immediate aftermath of historic Hurricane Harvey, to lend a human voice to any questions customers may ask. And in the event service is required, TIC field service experts are dispersed across North American to be deployed at a moment’s notice.

Company and Product/Service Overview, Activities in Texas

Cruise Housing Corporation (CHC) was established a local subsidiary of Japanese Cruise Holdings in 2015. Our headquarters is in Plano in the Dallas, Texas metropolitan area, and we develop real estate projects in Texas.

We select excellent houses, primarily in the Dallas metropolitan area, renovate them, transform them into investment properties as rental housing, and sell them as houses to investors, primarily from Japan. We have sold approximately 160 properties. Additionally, our subsidiary Cruise Housing Property Management (CHPM) provides management for apartments and houses. From property selection to sales and ongoing management, our Japanese staff provides ""one-stop"" service."

Fujitsu Network Communications (FNC) is a U.S. subsidiary of Fujitsu Limited, the leading Japanese digital transformation (DX) company offering a full range of technology, solutions, and services. FNC has been a trusted partner to North American network owners and operators for 40 years. FNC is located in Richardson, Texas operating Manufacturing, Development, Service, and Administrative functions. As a leading provider of DX infrastructure solutions for network operators, service providers, and content providers, FNC combines best-in-class hardware, software, and services with multivendor expertise. FNC delivers end-to-end and a la carte 5G offerings, Optical Networks, Network Automation, and Orchestration, founded on open principles, and scalable to any public or private application. Fujitsu utilizes open hardware interfaces and software to eliminate vendor lock-in and enable customization in a diverse array of operational environments.

Fujitsu’s software-defined, 5G solution includes five primary components: multi-layer software orchestration and control, wireline, wireless and edge compute network equipment, internet of things (IoT) applications and devices, and complete lifecycle support services. FNC is a prime network integrator leveraging in-house and best-in-class partner technology to build a better world through improved connectivity, communication, and collaboration.

Japan Airlines (JAL) is a certified 5-Star Airline and has been awarded second in the World’s Best Airline Cabins for Cleanliness in 2019 by Skytrax. JAL is committed to providing customers with the highest level of safety and quality in every aspect of its service and has implemented JAL FlySafe enhanced measures both on the ground and in-flight to support customers with essential travel needs today and those with travel plans in the future. At JAL Smart Airports, innovative technology has been implemented including self-service bag drop machines.

JAL and oneworld alliance partner American Airlines offer customers an extensive network with more seamless journeys for travelers flying between North America and Asia with smooth connections beyond. At DFW Airport departure gates, one-step biometrics boarding is now available for a more efficient, touchless experience.

Japan Airlines network reaches over 400 cities in more than 60 countries and regions together with its codeshare partners, and JAL SKY SUITE cabins across the Pacific include award-winning lie-flat seating in business class and JAL SKY WIDER seating in economy. JAL Premium Economy Class is also available on most routes.

"Based on a full year of Tripadvisor reviews, award winners are known for consistently receiving great flyer feedback, placing them among travelers' favorites around the globe."

Kajima Building & Design Group, Inc. (KBD Group) is a comprehensive construction solutions provider offering a 'single source' approach to fully integrated planning, design, and construction services. Few design and construction companies can match our available resources in technical skills, industry knowledge, building experience and financial stability.

We provide cost effective & flexible construction solutions including general contracting, design-build, construction management, and design services. Particularly, we offer fully integrated 'in-house' design and construction services for your project. Unlike other 'construction arrangements' in our industry, KBD Group is unique and unmatched in this capability by staying up-to-date with the latest technology while offering high level communication strategies with all business partners and the clients. Our single source contract assures you of a fully integrated organization that is able to seamlessly overlap design and construction. This project delivery method is proven to provide significant savings of time and money for any type project.

KBD Group is a subsidiary of Kajima Corporation in Tokyo, Japan. Kajima Corporation began its business in 1840. Today, it is ranked as one of the top global contractors, known for its innovation and single source capabilities in design, engineering, and construction.

Misawa Homes Co., Ltd. ("MH") is a home-builder to provide customized single-family detached houses all over Japan. MH decided in 2018 to advance into US and Australia under its business goal to expand the overseas business.

In the US, MH established its wholly owned subsidiary, Misawa Homes America, Inc. ("MA") in December 2018. In January 2019, MH purchased the interest of Impression Homes LLC ("IH") via MA to be included in its group companies.

IH is located in Southlake, Texas. IH is a home-builder to construct and sell single-family detached houses in DFW area. IH has developed its business, since it was established in 2009, to provide 582 units in 2019 primarily to first-time home buyers. MA, the holding company to oversee the operation of IH, is striving every day, in a partnership with IH, for providing affordable and high-quality houses for community's satisfaction.

Both IH and MA wish to contribute to the development of Texas State in the future.

Company and Product/Service Overview, Activities in Texas

NIPPON EXPRESS USA was established in 1962 as the first overseas subsidiary of Nippon Express. For nearly 60 years, we have provided comprehensive transportation services including Air and Ocean Import/Export, Warehousing, Trucking, and Moving services.

Since 1975, we have locations in Laredo, McAllen, and El Paso along the Mexican border, in addition to Dallas, Houston, and San Antonio. We are expanding our business through a network of six locations, the largest number of locations among Japanese logistics companies.

Each location has its own warehouse, a total of 276,000 SQF, and provides high-quality logistics services through in-house systems and extensive training.

We operate shuttle trucks that connect two major international hubs, DFW and IAH Airports, to various cities in Texas, providing a speedy Air cargo transportation network. In ocean freight forwarding, we provide our own transportation services which cover Port of Houston, West Coast, and East Coast in all directions.

Utilizing our network of strengths, we operate daily milk-run trucking services between San Antonio, the center of the Texas automotive industry, and automotive suppliers in various Midwest cities, as well as cross-border trucking services to Mexico.

Nippon Express has logistics capabilities to support your business in Texas, the U.S., and globally.

Annual Sales	<Texas> - <Global> 1,129,254 million yen (FY2019)	Texas TEL	-

Company and Product/Service Overview, Activities in Texas

Sekisui Specialty Chemical's mission is to be a leading innovative polymer solutions provider, utilizing its prominent technologies and dedicated associates to create sustainable solutions essential to a better, safer, and healthier life for people everywhere.

In June of 2009, Sekisui Chemical Co., Ltd. acquired Celanese's PVOH (polyvinyl alcohol) business, taking control of facilities in Calvert City, KY; Pasadena, TX; one unit within a complex in Tarragona, Spain; as well as resources in the company's Houston Technology Center. The Celanese acquisition resulted in Sekisui Specialty Chemicals establishing entities in the United States, Europe, and Mexico. Through these three entities, Sekisui Specialty Chemicals endeavors to expand on new applications for polyvinyl alcohol products, delivering consistent quality and service to our customers worldwide.

In 2018, Sekisui Specialty Chemicals also began representing 3 new brands: Durastream CPVC compound and resins, Advancell thermo-expandable microspheres, and SLEC BK polyvinyl acetal resins. These new products come with the decades of Sekisui Chemical Group experience and worldwide support in each industry. SSC represents these products globally, and we are ready to collaborate with customers to create tomorrow's essential products.

Toyota (NYSE:TM) has been a part of the cultural fabric in the U.S. and North America for more than 60 years, and is committed to advancing sustainable, next-generation mobility through our Toyota and Lexus brands. During that time, Toyota has created a tremendous value chain as our teams have contributed to world-class design, engineering, and assembly of more than 40 million cars and trucks in North America, where we have 14 manufacturing plants, 15 including our joint venture in Alabama (10 in the U.S.), and directly employ more than 47,000 people (over 36,000 in the U.S.). Our 1,800 North American dealerships (nearly 1,500 in the U.S.) sold nearly 2.8 million cars and trucks (nearly 2.4 million in the U.S.) in 2019.

Since 2017, as part of the "One Toyota" initiative, all operations in North America (R&D, manufacturing, sales, marketing, after sales and corporate functions) are conducted under "Toyota Motor North America (TMNA)".

Annual Sales	<Texas> \$6.5M <Global> 4,43,694 million JPY	Texas TEL	512-252-3411

Company and Product/Service Overview, Activities in Texas

Provides cleanroom transport & storage systems essential in manufacturing semiconductor. Automated Storage/Retrieval System (AS/RS): A combination of equipment and controls that handles, stores, and retrieves materials with precision, accuracy and speed. Systems can vary from relatively simple, manually controlled point of use storage structures to computer-controlled storage and retrieval systems that are completely integrated into the cleanroom process.

Conveyors: Monorail conveyor system utilizes a non-contact power supply, which has garnered attention as the next-generation transport system to create a clean environment. The system supplies electric power to moving objects without coming into contact with them.

Company and Product/Service Overview, Activities in Texas

Gunze Electronics, USA, delivers the world’s most reliable touch screen interfaces for the world’s most demanding operating environments—from factory floors and delivery routes to medical and defense applications.

We work closely with OEMs and systems integrators to ensure every touch screen that we provide delivers the optimum balance of operational precision and environmental durability.

We provide a wide range of touch screen solutions, from specialized films to complete touch screen modules. This includes a full line of touch modules for a complete display solution. We can customize any mixture of touch panel and LCD, with either air gap or optical bonding.

Projected Capacitive Touch Panel "PCAP"	Base unit (Touch Panel with LCD)	CAPACITIVE BUTTON
<p>Others made of glass are the main-stream type of capacitive touch panel, but Gunze offers products made of film by exploiting the material technologies we have cultivated. We deliver capacitive touch panels that are thinner and lighter than those made of glass.</p>	<p>On this product, a capacitive touch panel and LCD are laminated together, and we offer quality assurance for the combined unit. These units are suitable for industrial applications such as FA equipment, public terminals, and medical systems.</p>	<p>Capacitive buttons are applications of wiring printing technology. By forming a mesh-shaped pattern on film, we prepare products with outstanding bending performance capable of light transmission.</p>

NIPPON EXPRESS USA was established in 1962 as the first overseas subsidiary of Nippon Express. For nearly 60 years, we have provided comprehensive transportation services including Air and Ocean Import/Export, Warehousing, Trucking, and Moving services. Since 1975, we have locations in Laredo, McAllen, and El Paso along the Mexican border, in addition to Dallas, Houston, and San Antonio. We are expanding our business through a network of six locations, the largest number of locations among Japanese logistics companies. Each location has its own warehouse, a total of 276,000 SQF, and provides high-quality logistics services through in-house systems and extensive training. We operate shuttle trucks that connect two major international hubs, DFW and IAH Airports, to various cities in Texas, providing a speedy Air cargo transportation network. In ocean freight forwarding, we provide our own transportation services which cover Port of Houston, West Coast, and East Coast in all directions. Utilizing our network of strengths, we operate daily milk-run trucking services between San Antonio, the center of the Texas automotive industry, and automotive suppliers in various Midwest cities, as well as cross-border trucking services to Mexico. Nippon Express has logistics capabilities to support your business in Texas, the U.S., and globally.

Company and Product/Service Overview, Activities in Texas

Toyota broke ground on a manufacturing plant in San Antonio, TX in 2003, building its first truck in 2006. The plant started exclusively building the Tundra truck and added the Tacoma in 2010. As the plant grew, eventually adding a second shift, employment also grew. Today, TMMTX employs around 3,000 team members and another 4,000 people work for suppliers on the 2,000-acre campus. In 2020, Toyota announced new plans for the plant. To focus on full-size body-on-frame vehicles, TMMTX will welcome the Sequoia SUV to its lineup in 2022 after transitioning the Tacoma to other plants. With new technology supporting manufacturing advancements currently being added to the facility, Toyota has invested over \$3 billion into the San Antonio plant since its groundbreaking.

TKR has a strategic location in one of the main imports and export ports for international trade in USA/MEXICO, a city that gives competitive advantages in the market.

Our current infrastructure includes 2 industrial buildings: 1 manufacturing plant in Nuevo Laredo, Mexico, and 1 Warehouse & Distribution Center in Laredo, Texas. These facilities ensure our company has the capacity to fully support the manufacture of products in a coordinated, effective and safe way to our customers.

We aim to continue growing together with our customers.

Our Philosophy “All services and products that we deliver start from listening to the customer’s voice.

Company and Product/Service Overview, Activities in Texas

Vinton Steel, LLC is a mini-mill that produces steel with EAF technology and uses ferrous scrap as a primary raw material.

The steel making facility consists of two electric arc furnaces, continuous casting and rolling mill, recycling more than 250,000 tons per year.

Automobiles, major household appliances, industrial scrap and other forms of salvaged steel are converted into new steel products in our plant.

Operations include scrap processing facilities, a steel mill, rolling mill, and a grinding ball mill.
