### MESSAGE FROM ORGANIZERS

In 2022, direct investment from Japan to Vietnam risen by 12% over the previous year with a value of up to US\$4,559 million. For Vietnam, Japan has been an extremely important partner, ranked 3rd in accumulative value by country and 2nd in terms of number of projects.

According to JETRO's survey, the share of domestic purchasing content of Japanese companies in Vietnam has climbed from 28% 10 years ago to 37% in 2022. Although it has steadily grown, its expansion ratio is still very slow compared to the development of the two countries' economies. The report also showed that the procurement rate of raw materials and parts from Vietnamese suppliers for the production of Japanese FDI entrepreneurs accounts for 15%, this rate was even lower than Indonesia (19.1%), Malaysia (21.6%) and Thailand (23%).

In such a context, we have made every effort to regularly organize the supporting industries exhibition every year, alternatively in 2 major cities of Ha Noi and Ho Chi Minh to support increase of localization for Japanese manufacturers, and help local makers improve their own supply capacity. The Supporting Industry Exhibition (SIE) this year attracts 50 exhibiting companies from both Japan and Vietnam. We hope that this is a promising place for all exhibitors to find the desired partners.

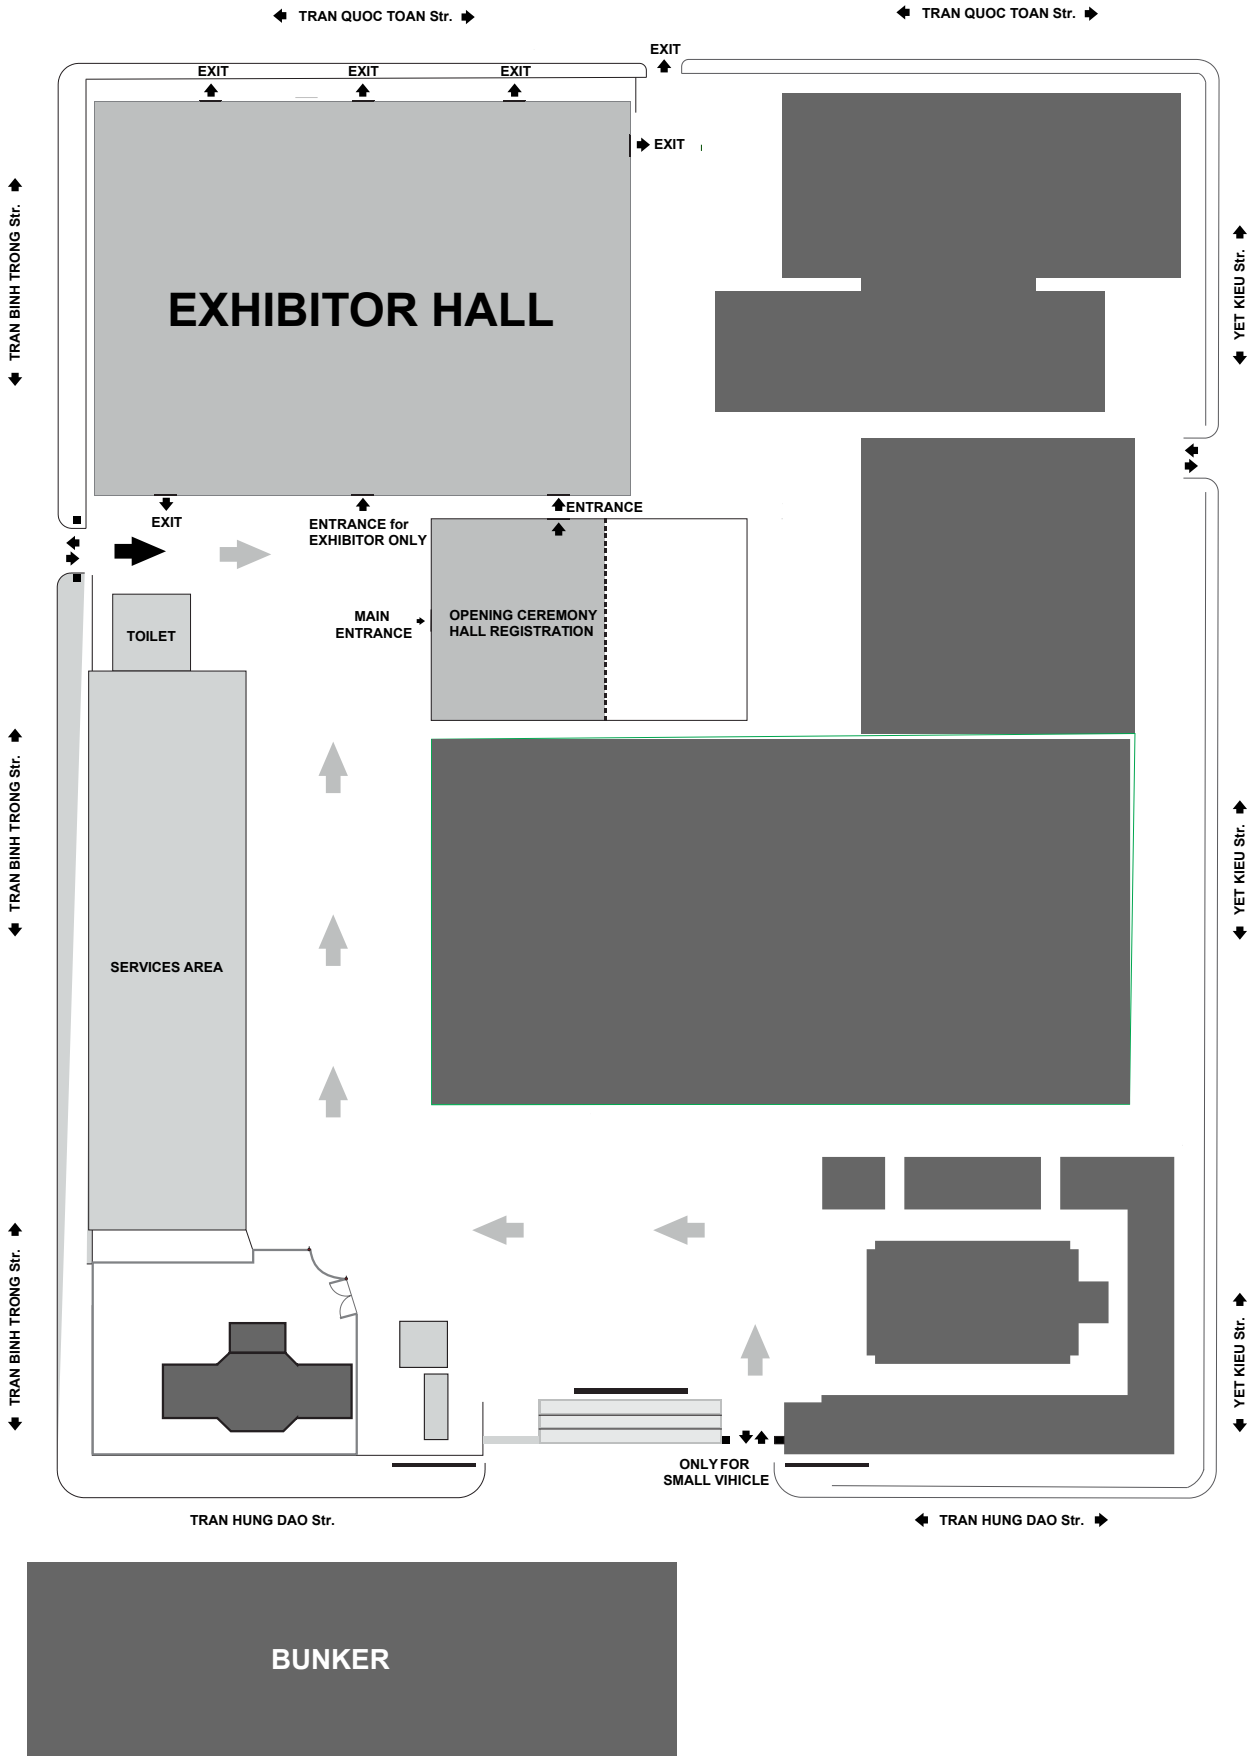

The event is implemented with the high consensus of the two countries' leaders, within the framework of the signed Vietnam-Japan Economic Partnership Agreement (VJEPA) by both governments in 2008. In addition, it is also one of the themes under the Vietnam – Japan Joint Initiative.

Wishing all businesses good health, success and lots of connections with promising counterparts.

Thank you very much.
