FIRS	Food Import and Re-Export Service
*	This symbol appears beside filed names denoting that this field is mandatory.

Getting started with ZAD

System Overview

ZAD is the Federal Portal for Food Trade, a subsidiary of Dubai Municipality, launched by the government of Dubai in the United Arab Emirates. The portal facilitates for food business operators registering their companies and products. food business operators with Dubai IDs can log on to ZAD and link their accounts to their companies. A user could be a company owner or an employee responsible for managing the required procedures on ZAD.

Any registered company that wants to produce a new food product in UAE should register this new food product and provide all the required information and certificates in order to get approval.

ZAD offers searchable lists with all banned food items, circulars, and registered food items. In addition, registered users could search for approved Islamic entities and slaughterhouses worldwide that have been accredited by UAE authorities for Halal slaughtering of animals for meat products.

Log on to the system

- To log on to ZAD Portal:
 1. In Google Chrome web browser, in the Address bar, enter the URL of ZAD portal- www.zad.gov.ae , and then press Enter.
 2. In the Sign in page, enter your user name and password (Dubai ID).
 3. If you don't have Dubai ID, please register in Dubai ID. There is a link on top of login user name and password for registration. Click "Register with My ID" for more details

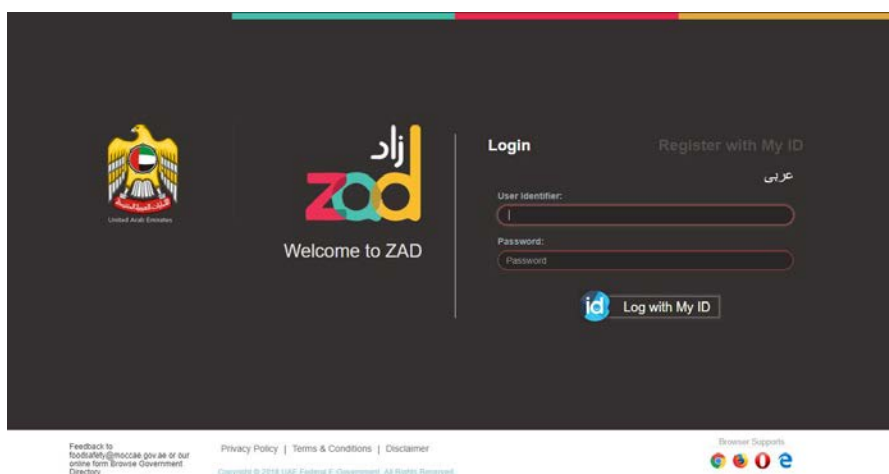

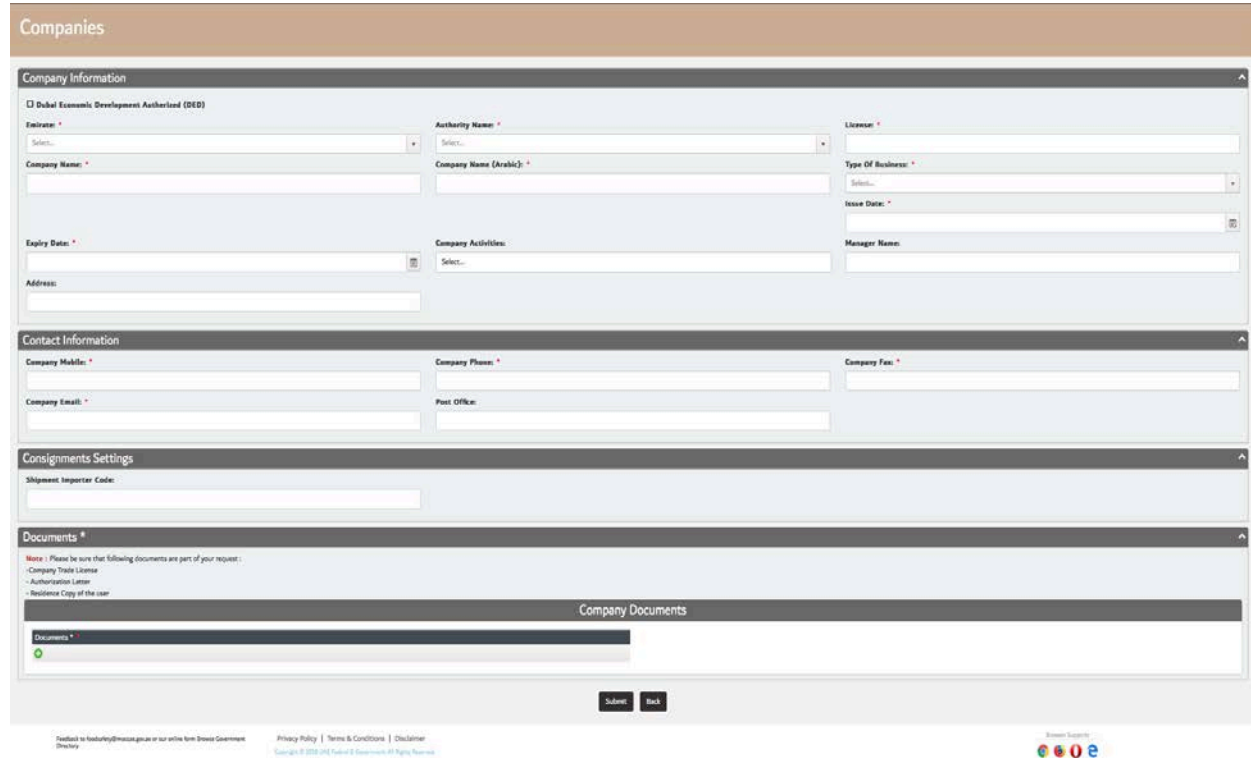

Figure 1: ZAD Sign in webpage

4. Enter Dubai ID/ Password then Click Sign in.

First Time Users after login MYID:

First Time Users after login MYID, would have only access to link company page. In which they can request their companies to be linked. Only after approval of their request they will gain access to the system and they will start work on ZAD

If Company registered in Dubai Economic department(DED), please click the check box, otherwise for other authority please select from the list authority applicable to your company. Please fill in all required details include attachments. Once you completed your request please lick Submit. Once your application approved you will be notified by SMS/EMAIL, so please make sure your enter valid mobile number.

Most of the fields are mandatory please fill carefully all necessary fields including attachments.

A glance at the portal pages

In this part of the document, we have an overview of ZAD Portal.

Main Page

This page is the Home page of ZAD Portal.

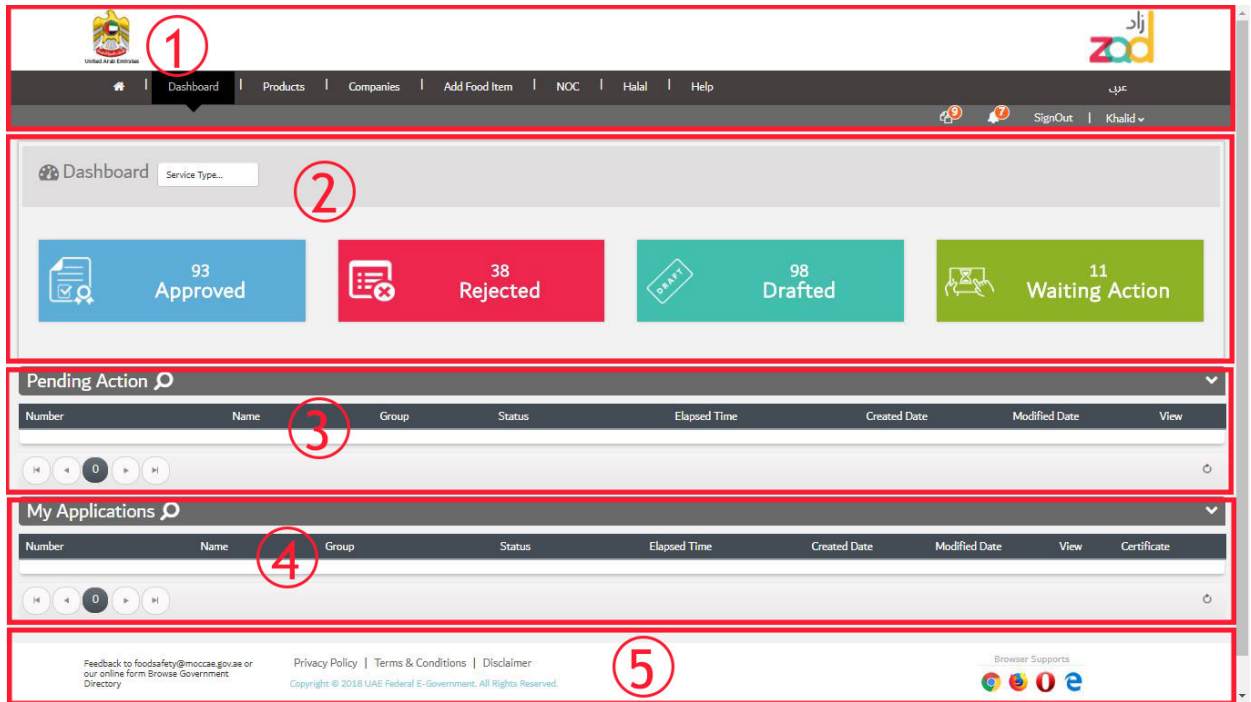

Figure 2: Main Window

- This window consists of the following elements:
 1. Page Header, and System task bar. Page Header includes the following features:
 - The United Arab Emirates and ZAD logos.
 - Home  , and Navigation Pane: You can access any of the portal's pages or return to the Home page through the navigation pane.
 - Language button: to switch the system user interface into Arabic.
 - While System task bar, and it contains the following buttons:
 - * Sign out: to end your session.
 - * Profile: to manage your companies and view your account details.
 - * Notification: to show system notification like application approval, rejection, incomplete, etc.
 - * Printing Basket: Basket which will include all selected product that user want to print certificate for.

2. Dashboard: It has list of services filter and dashboard with the status of all applications done by the signed-in user. List of Service drop filter/down list by default is for all services, unless user wish to filter the dashboard for one type of service like "Add New Food Item" or "NOC". Dashboard displayed Approved application, rejected applications, drafted applications (which re applications is not yet submitted to back end) and waiting action, which items require logged-in attention. The dashboard is interactive and logged-in user could click on the dashboard which would display related records accordingly
3. Pending Action: Here there will be a list of all user's applications that are pending action like draft and not submitted or incomplete applications return by back end users. By clicking the little arrow on the right-hand side, search screen open, User could use search to filter or search for specific applications - see below screen shot.

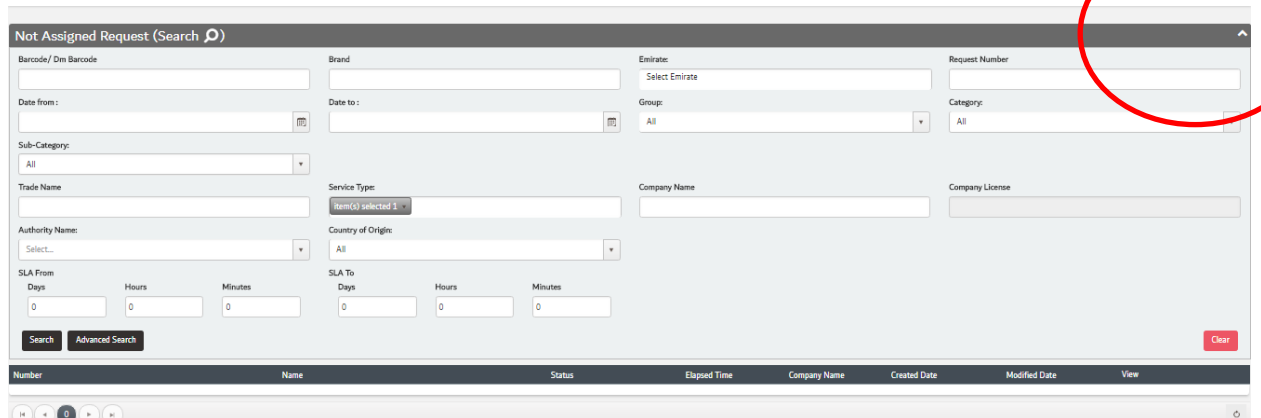

Figure 3: Expanding Application window for Search

4. My Applications: Here there will be a list of all user's applications, not only pending, but all applications regardless of its status. By clicking the little arrow on the right-hand side, search screen open, User could use search to filter or search for specific applications - see below screen shot. By clicking on view icon, user would be able to see full application/request details.
5. Footer: Here users would find many links and information, like support number, and other links to accessibility, privacy policy, disclaimer, etc.

Figure 4: view button for displaying application details

Services page

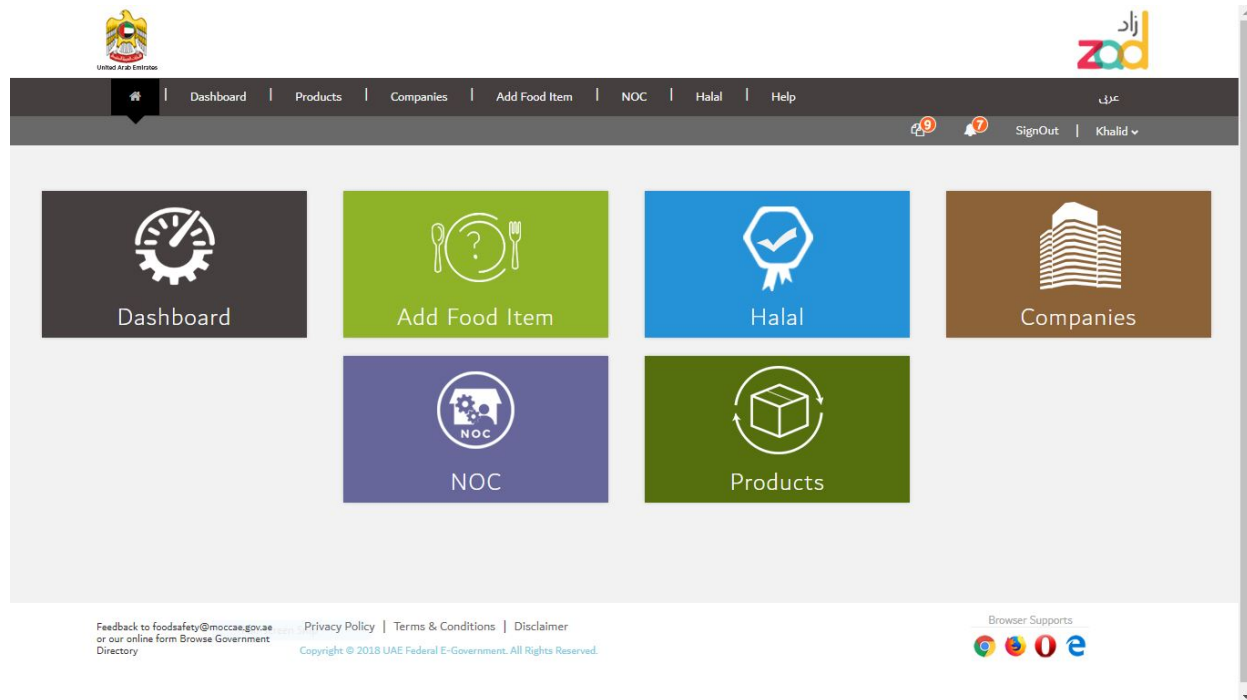

Figure 5: Services Page

- The Services page displays contain links to all other system modules and pages.
 - Dashboard: displays all transactions or requests whether related to food items or No Objection Certificate (NOC) related to the selected company; in addition to links to manage new and linked companies.
 - Add new food item: to register new food items.
 - Halal: to find approved Islamic entities and slaughterhouses worldwide that have been accredited by UAE authorities for Halal slaughtering of animals for meat products.
 - Companies: shows the companies that users have linked it to his account. Also, through company icon users could request for new company to be linked or new user to be linked to his/her company.
 - NOC: to request No Objection Certificate to transfer food shipments between the different emirates.
 - Products: Allow users to search for products catalog.
 - Help: include user manual and video guide.

Companies

Companies pages shows the companies that users have linked it to his account. Also, through company icon users could request for new company to be linked or new user to be linked to his/her company, User can add new companies or link their accounts to an already ZAD registered company. Your profile contains a list with added and linked companies to this user's account.

When user click on companies he will get the following landing page

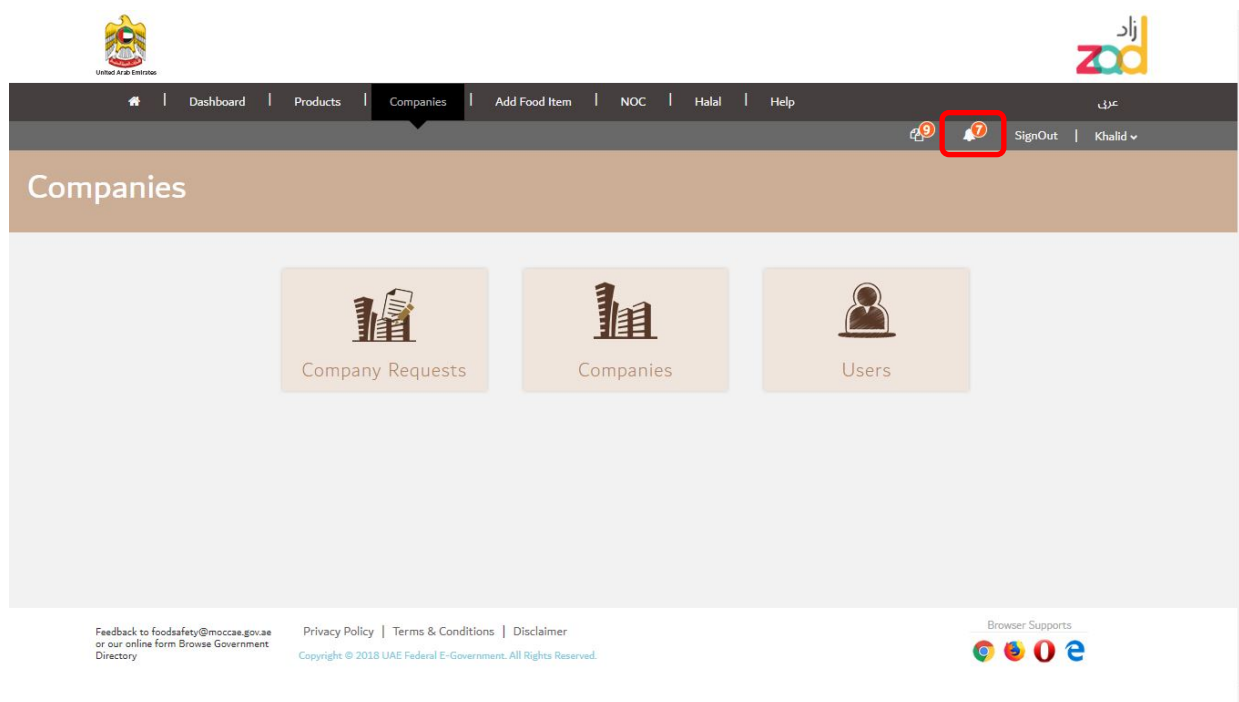

Figure 6: Companies Main Page

Company Requests

- To add a request to link your account to a new company:
 1. From Companies landing page, Click Company Requests.
 2. Users would see list of all requests along with its status (Approved, Rejected, waiting for action), user can click view to view full request data for selected record.

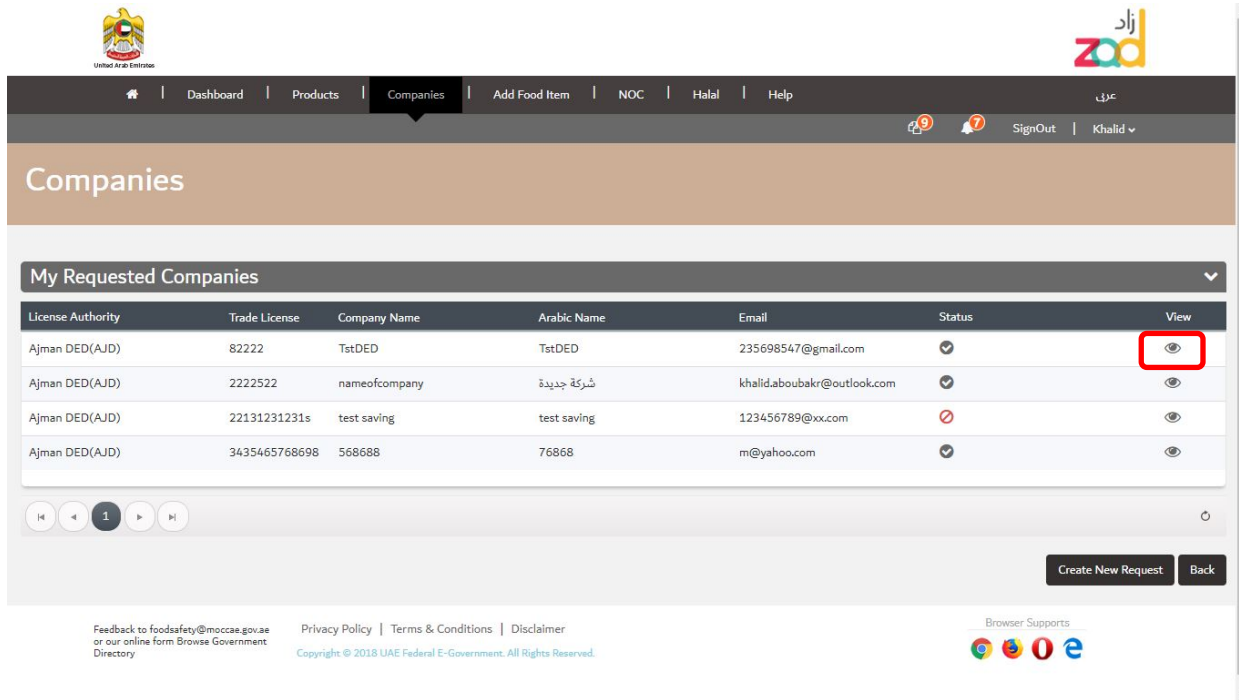

Figure 7: Company Requests Page

3. To link new company, user should click “Create New Request”
4. Please note for first time users, they will be directed to companies’ page direct as they will not have access to other service till they link at least one company.

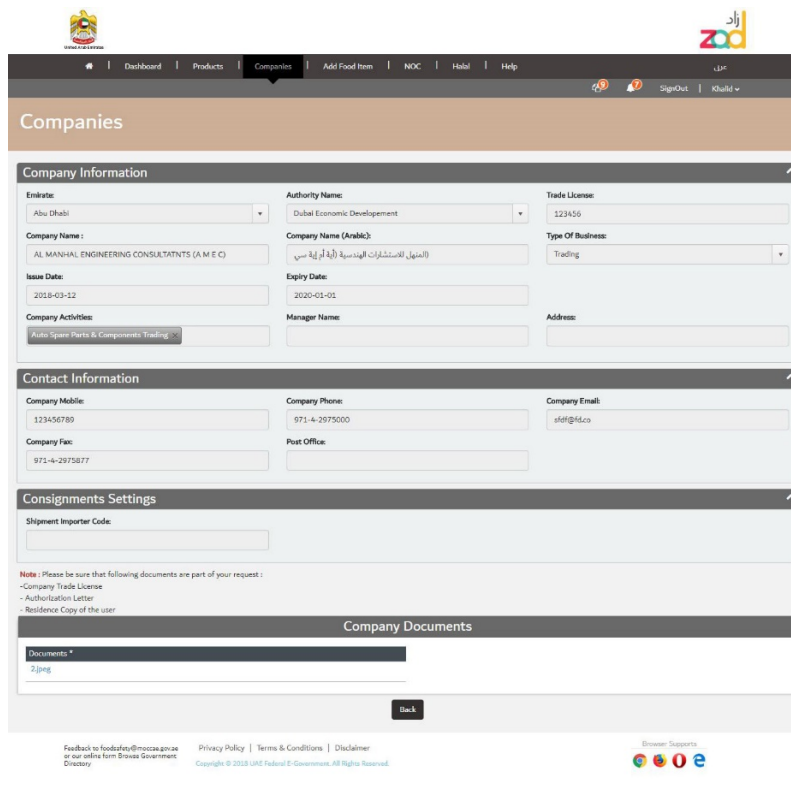

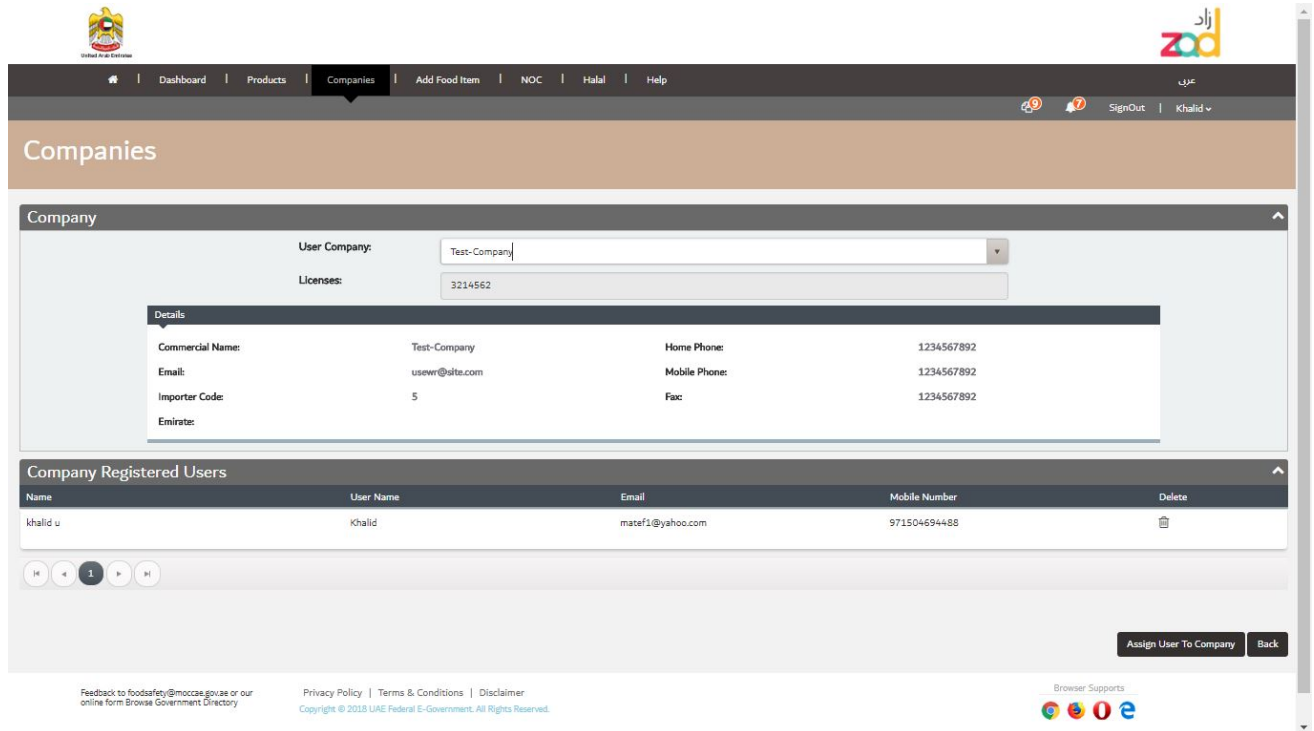

Figure 8: Add new company form

- In the Company Details part, enter the details such as the company name, and the license number, Authority. If Authority is Dubai Economic Department, then please click Check Box “Dubai Economic Department(DED)”.
- Please fill all requested details and attach company documents.
- Please click submit.
- Your request will be processed by back end staff, you can check your request status through company requests page/screen
- Once your request is approved, users would be able to add other users to this company using user Dubai ID, to do that please click on users icon, select your company from the companies drop down list then click button Assign users to the company.

The screenshot displays the 'Companies' management interface. At the top, there is a navigation bar with options like Dashboard, Products, Companies, Add Food Item, NOC, Halal, and Help. The main content area is titled 'Companies' and contains a 'Company' section with a dropdown menu for 'User Company' (set to 'Test-Company') and a text input for 'Licenses' (set to '3214562'). Below this is a 'Details' table with the following information:

Details			
Commercial Name:	Test-Company	Home Phone:	1234567892

Importer Code:	5	Fac:	1234567892
Emirate:			

Below the details is a 'Company Registered Users' section with a table listing users:

Name	User Name	Email	Mobile Number	Delete
khalid	Khalid	matef1@yahoo.com	971504694488	

At the bottom right, there are buttons for 'Assign User To Company' and 'Back'. The footer includes feedback information, privacy policy links, and browser support icons.

Figure 9: Company Users and Assign new Users Screen

Food Items

You can use ZAD to:

- Search the food item catalog based on one or multiple search criteria.
- View matching food items and specific details based on search criteria.
- Register a new food item.
- Register a new food item from an existing one.
- Search for bans or circulars related to food items.
- Print the certificates of specific food items through the basket, by clicking certificate icons , you will be able to add selected food item to the basket.

Search for food items

You can search for a specific food item using its international barcode, or you can define multiple search criteria to show all food items that match these criteria.

Search for food items using barcode

- To search for a food item using its international barcode:
 1. After signing in, on the Search bar, click Products from menu or from Services icons.

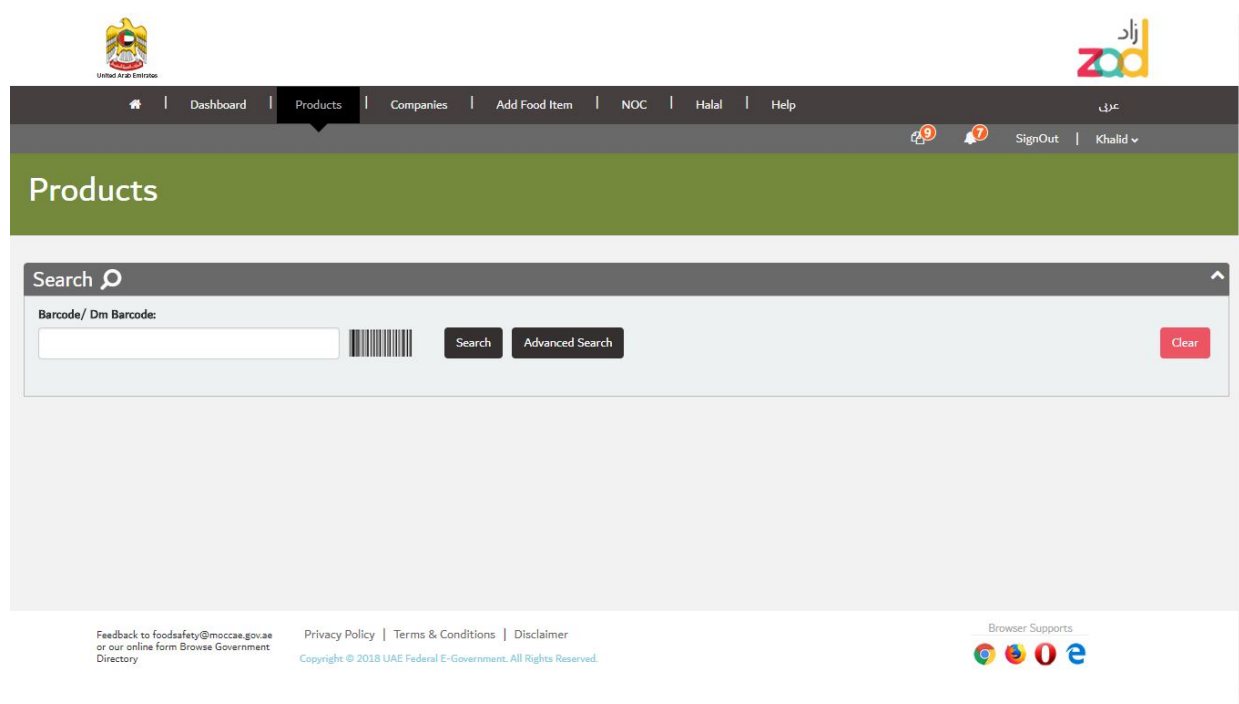

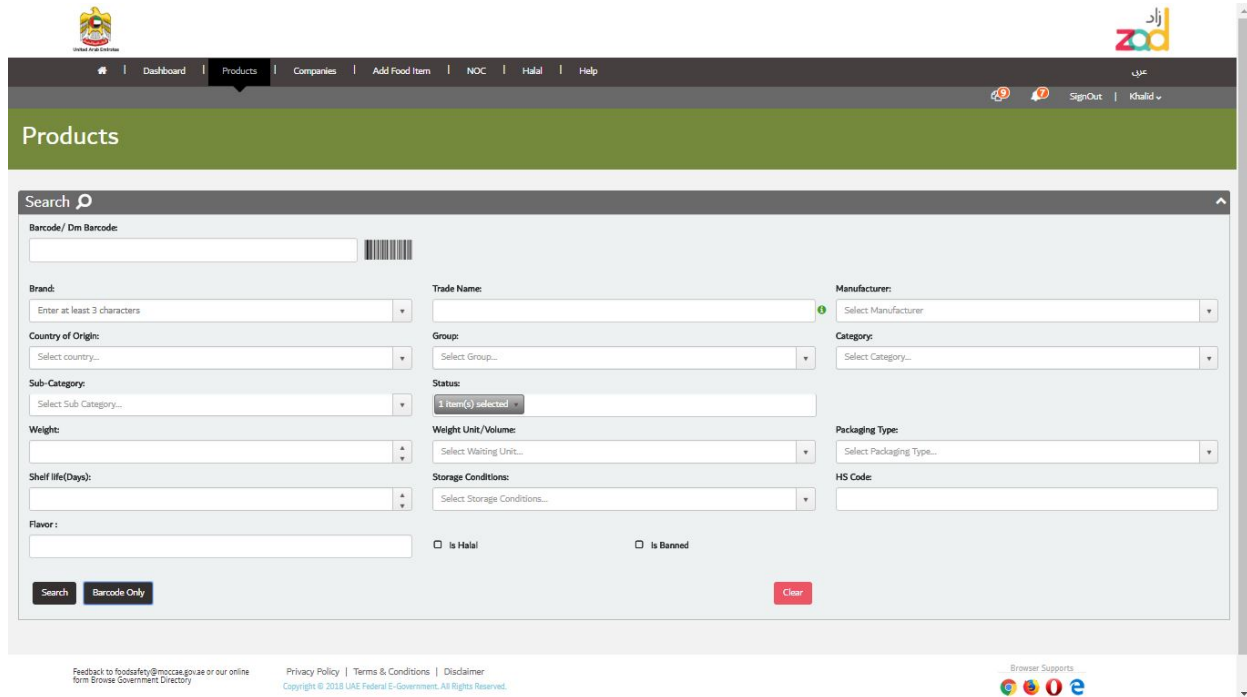

Figure 10: The Search screen

2. In the Search page, enter the barcode of the food item you want to search for or click advanced search

 - To submit the completed form to register a new food item, click Submit.
 - You will notice that workflow of the process gets updated based on its current status, it is also has color coding. Current Process would be amber, completed step would be green and step yet to be done would be in RED.

Add Food Item Workflow/ Notes:

1. Add Food Item could be applied by customers.
2. Once food items are added by one company there is no need for other company to apply for it.
3. Add Food Items Steps are
 - Application
 - Review/initial approval

- Assessment
 - Listed
4. Add Food Items applications/request could be displayed only by emirate (based on front end user/company emirate).

Edit the details of a food item

You can edit the details of one of your food items that is saved as a draft, or that has returned after submission because of missing/incomplete data. Submitted, approved, and rejected items cannot be edited.

That could be done through dashboard screen from the Pending Items section.

No Objection Certificates

In case you need to transfer a shipment/ consignment of food between emirates within the UAE, you have to apply for a No Objection Certificate (NOC). You have to define the source emirate and the destination one. The request to obtain an NOC has to be approved by both the source and destination emirates, then only it will be released from source emirate and then received by destination emirate for the completion of consignment release process.

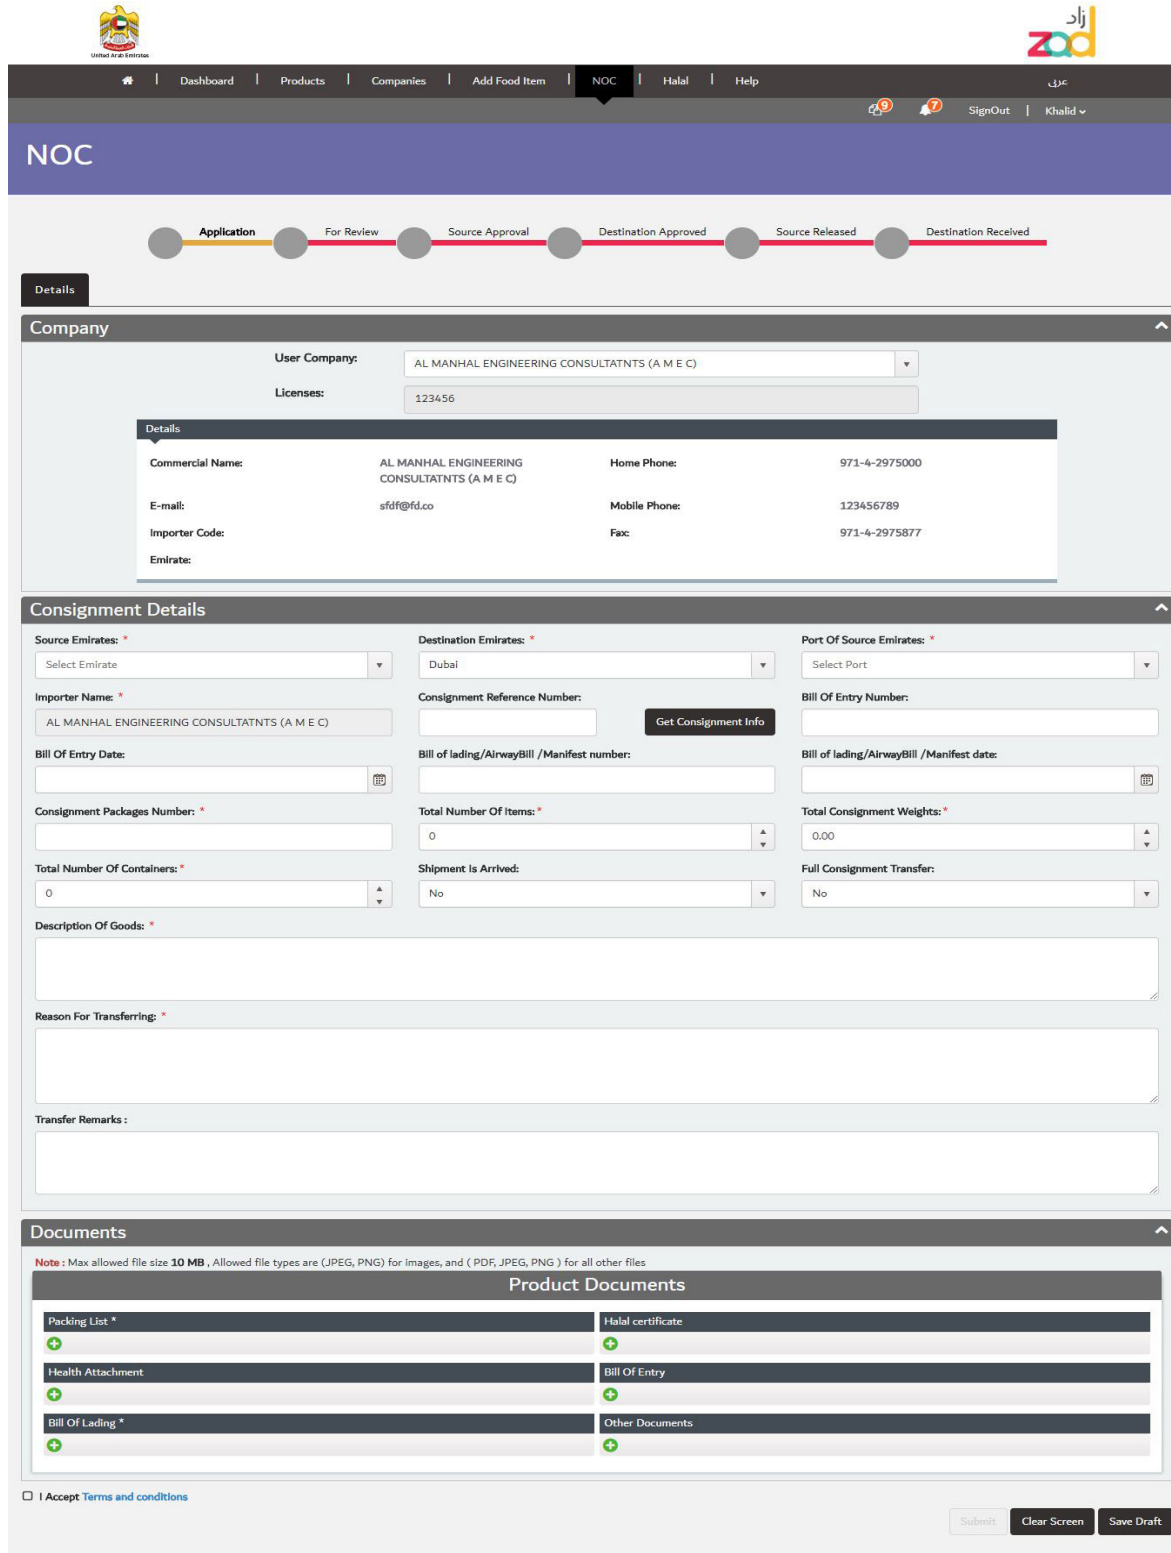

Applying for NOC

- To apply for NOC:
 1. From the navigation pane or the system control panel, click NOC or from Services Screen.
 2. In the NOC page, enter the required details.
 3. You will notice that workflow of the process get updated based on its current status, it is also has color coding. Current Process would be amber, completed step would be green and step yet to be done would be in RED.

NOC Workflow/ Notes:

5. NOC could be applied by customers.
6. NOC Steps are
 - Application
 - Source Approval
 - Destination Approval
 - Source Release
 - Destination Receive
7. NOC applications/request could be displayed only by emirate who either a source or a destination emirate
